Working from Charts

When working from a chart remember that for each odd-numbered row (right side of work), you work the chart from right to left; but for each even-numbered row (wrong side of work), you work the chart from left to right.

If you have never worked from charts, we suggest you follow the written instructions until you are told to refer to the charts. We have included written instructions for the first several rows of the body and the sleeves and also for the rows which contain decreases or increases.

Using Many Colors

The *Coat of Many Colors* requires numerous color changes. For ease of working with many colors, we suggest winding several small to medium size balls of each color. Place one ball of each color in a small zip-type plastic bag, close baggie, leaving long strand for working. Use a separate bag for each color change. Replace yarn as necessary.
