Materials:

Yarn: Worsted weight in 4 colors:

Color 1: (suit/hose)

Color 2: (belt/gloves/boots)

Color 3: (oxygen tanks)

Color 4: (hose connectors)

Crochet Hook: Size F

Tapestry needle

Fiberfill (or your preferred type of stuffing)

Felt (for face)

Felt glue (optional)

All parts of the doll are made in the spiral, there are no joined rounds (except hose connectors). Mark your rounds with a stitch marker or safety pin. Gauge is not important as long as you keep your tension even through the entire piece. Using a smaller yarn and hook will give you a smaller doll, as well as increasing the size of yarn and hook will give you a bigger doll.

Abbreviations:

st - stitch

sc - single crochet

inc - increase (place 2 stitches in next stitch)

hdc - half double crochet

sc2tog - single crochet 2 stitches together

dc - double crochet

Lines done in blue are stitches or special directions that are not repeated through out the pattern.

Pattern for personal use only. Not for retail or commercial use with out written permission from Amber Jolly.

Fasten off, leave a long tail for closing opening and sewing to body. Using tapestry needle, run thread once through front loop of each stitch (5), pull tight to close off. Push needle down through center coming out the side and sew to body. Stitch the two tanks together with a few stitches once each one is attached to body.

Oxygen Hose:

Using color 1 (hose):

Leave a small tail at front, chain 15 stitches. Fasten off and leave another short tail at end.

Hose Connectors:

Make 2.

Using color 4 (hose connectors):

Sc 6 stitches into ring, join round at end with slip stitch. Fasten off, leave tail for sewing.

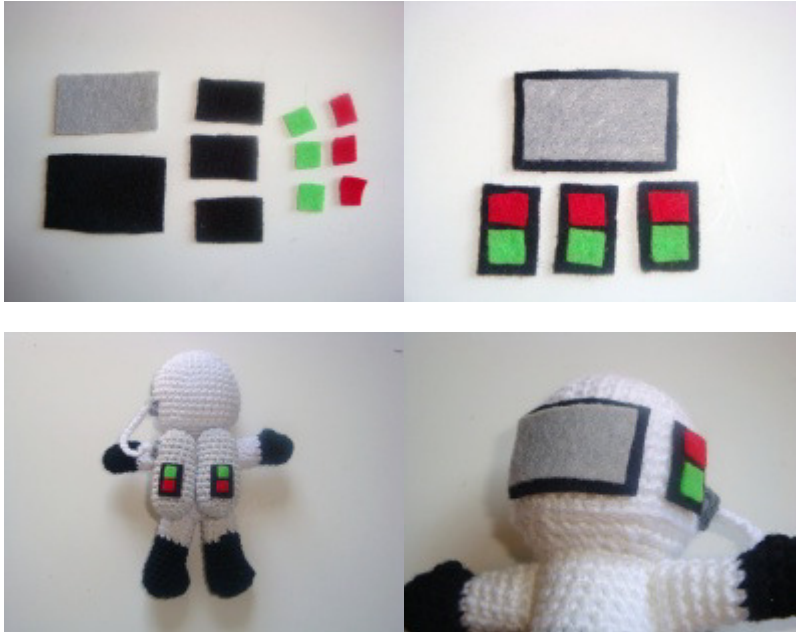

For attaching hose and hose connectors, place small tail of hose through middle of the connector. Tie together with the tail you used to pull your ring tight. Clip tails of knot. Do same for other connector at opposite end of the hose. Now place one hose connector on head and sew in place. Place other hose connector to oxygen tank and sew in place. When sewing in place run one of your stitches through the hose from underneath as well to make it more secure.

Details:

Cut out felt. Assemble, glue or sew to face and oxygen tanks.

The end ☺.
