Traditional Square II

Worked as Traditional Square I.

Work 1 round each in colours A, B, C and D.

Although bamboo needles are beautiful and light to use, they can often be sharp and split the yarn. Consider using an alternative such as Addi Turbo Needles – made of ‘Turbo’ finish brass. These needles are fast, quiet and easy-to-use.

Picots = when a single picot loop occurs after a solid stitch, note the usual method of working the closing slip stitch.

Figures = figures indicate round (or row) numbers.

Motifs = when the base ring of a motif is drawn as a plain circle, make it by looping the yarn around a finger.

Colour = letters A, B, etc and also light and heavy stitch symbols confirm changes of colour.

Arrows = once you are familiar with the basic fabric-making procedures, it is usually clear where a stitch pattern diagram begins and ends, which direction a row goes (Hint: Look for the turning chain), etc. If there is any doubt, additional directions are given with the help of various arrows.

Stitch diagrams are detailed 'maps' of fabric showing the right side uppermost. They enable you to see what you are going to do before you start and also where you are at any moment.

Spikes: The stitch symbol is extended downward to show where the hook is to go through the fabric.

Raised (relief) stitches: When a stitch is to be worked by inserting the hook behind a stem (instead of under the top two loops), the stitch symbol ends in a 'crook' around the appropriate stem. The direction of the crook indicates which side of the fabric the hook is to be inserted. On a RS row, work a raised stitch with a RS crook at the front and one with a left crook at the back.

Back/front loop: Stitches that are to be made by inserting the hook under only one of the top two loops are indicated by heavy and lightweight stitch symbols with underlining. A lightweight symbol in conjunction with an underline means pick up the loop nearest the right side of the fabric, i.e. front loop on right-side rows, but back loop on wrong-side rows. A heavyweight symbol with an underline means pick up the loop nearest the wrong side, i.e. back loop on right-side rows, but front loop on wrong-side rows.

A heavyweight symbol with an underline means pick up the loop nearest the wrong side, i.e. back loop on right-side rows, but front loop on wrong-side rows.

Distortion: The stitch symbols are drawn and laid out realistically, but are distorted for the sake of clarity. Sometimes, for example, single crochet stitches may look extra long. This is only to show clearly where they go and you should not to make artificially long stitches.

When the diagram represents a fabric that is **not** intended to lie flat – for instance, a 'gathered' or **frilled** edging – since the drawing itself has to remain flat, the stitch symbols have to be stretched.
