Why we love Amigurumi

THE AIM OF THIS BOOK is to offer an insight into the art of Amigurumi, and to take you through easy projects with step-by-step guidance to give you the confidence to move on to more advanced projects.

If you are an absolute beginner to crochet, it is worth spending some time practising basic techniques such as the magic circle, double crochet, increasing and decreasing. Once you have mastered these skills, you can move from project to project as you wish, creating anything from cute egg bunnies to the fiercest dinosaur!

We have also embellished our creations to try to offer an insight into the endless possibilities of beads, felt and thread. Every one of our patterns is highly adaptable to suit the recipient: for example, if the toy is intended for a young child, beads may not be ideal. In this case, you can simply crochet or embroider a simple substitute.

We, and our families, have spent many hours planning the designs, colours, and instructions in this book. We have taken inspiration from many different sources and hope we can pass this inspiration on to you, so that you may embark on these projects with a degree of passion that matches our own.

We love Amigurumi because it is based on very simple techniques, but the completed projects are amazing. We wanted to share the joy of a hobby that is all gain and very little pain, and we hope that you have as much fun with this book as we have had creating it.

Making up

Using yarn tails attach ears to body, 5 rounds down from centre. Attach safety eyes or beads between rounds 9 and 10, leaving 10 sts between. Cut a felt oval for the muzzle and embroider nose and mouth on it. Attach muzzle between eyes using adhesive, or sew in place.

Safety note

If the toy is to be used by a child, ensure that the eyes are very securely attached. If you prefer a washable toy, omit the felt muzzle and embroider the nose and mouth directly on the toy.

This trio of cheeky characters make ideal mobile phone charms or key rings. They are really simple and fast to work, so you'll soon be making them for all your friends.

Note

Make a whole family of these little mice in different colours to use up all your oddments of yarn.

Making up

Thread through several additional lengths of yarn and combine with the long tail piece. Braid to form tail and trim to desired length. Knot ends securely and trim.

Sunny yellow and bright white combine to make a simple toy that is sure to become a favourite. The red 'crown' adds a jaunty touch.

Making up

Attach eyes between rounds 12 and 13, 10 sts apart. Stuff toy parts and attach head and limbs to body. Sew skirt to body at round 14 from beg of magic circle. Attach ears, beg at round 2. Embroider nose and mouth.

This little creature might look cross, but in reality he's as cuddly as a teddy bear. He's ideal for any little boy who secretly likes soft toys but wants something a bit more macho to play with.

Making up

Cut two large black felt ovals and two smaller white ovals for eyes. Make a hole in each piece for eyes to pass through and attach to head. Cut a felt oval for nose and glue or sew to head between eyes. Stuff all pieces. Attach ears, beg at row 5 from top of head. Sew limbs and head to body. Sew tail to back of body at row 5 from bottom. Sew in ends.

Note

If you do not wish to use felt for this toy, crochet small circles using black and white yarn and the magic circle technique, and use for the eye pieces.

Have you ever looked at a zebra in a zoo?
Then you'll know that they are not actually black and white, but more
off-white and grey – just like this gorgeous little playmate.

How to make your lovely Amigurumi

What is Amigurumi?

Amigurumi is the art of knitting or crocheting small stuffed animals or anthropomorphic creatures. The word derives from the Japanese words *ami*, meaning crocheted or knitted, and *nuigurumi*, meaning stuffed doll.

Amigurumi creatures are made from yarn that is worked with a smaller size of hook than is usual for the weight of yarn. This produces a closely-woven fabric without any gaps through which

stuffing might escape. Amigurumi are usually worked in sections and joined, though some designs may have a head and torso but no limbs, and be worked in one piece.

The simplest Amigurumi designs are worked in spirals, but unlike traditional Western crochet, which is usually made in joined rounds, the various parts are made individually, then stuffed and sewn together. A typical Amigurumi toy will consist of an over-sized round head,

a cylindrical body, arms and legs, plus ears and tail if appropriate. The body is usually stuffed with fibre stuffing, while limbs and other extremities are sometimes stuffed with plastic pellets to give them a lifelike weight. Safety eyes may be used, or the features may simply be embroidered on the toy. Felt is often used to create the ears, face, or nose, and it may also be used to make cute embellishments.

Welcome to the world of Amigurumi!

Crochet

Crocheting is a method of creating fancy lacy patterns using yarn and a single hook. Little is known of its history, and the earliest known examples date only from the 18th century, when it first became popular in Europe. It may have evolved from traditional craft practices in Arabia, South America or China.

Originally we were knitters, and taught ourselves how to crochet from a book. We now agree that crocheting is far easier than knitting; it is simply pulling yarn through a loop. Another appealing factor is the speed of crochet, and it is convenient when travelling: no need to worry about needles poking from your bag at rush hour, or dropped stitches!

The fabric produced by crochet is different from knitted fabric. Knitting produces regular stitches and a fabric that is usually quite stretchy. Crochet, however, produces stitches that are more compact, so the resulting fabric is denser and less stretchy. The qualities of crochet fabric mean that it is perfect for making Amigurumi.

Crochet hooks

Traditional crochet hooks range from a bent needle in a cork handle to expensively-crafted silver, brass, steel, ivory and bone hooks. Modern hooks are usually made from aluminium, plastic or steel, but are also available in wood and bamboo.

For Amigurumi, we recommend aluminium or steel hooks. We often work with pieces that require tight, dense stitches and find metal hooks easier to use as they slip more easily between the stitches. We can also pull on them as much as we like without

worrying that they will snap! The obvious disadvantage of metal hooks is that they are cold to the touch and can be very slippery, so choose what you feel comfortable with. For projects that require larger hooks or very thick yarn, it may be worth experimenting with wooden hooks as they are not as slippery as metal hooks and are available in beautiful designs.

Hooks are sized according to thickness, and the size is identified in millimetres or by a letter (US). In this book, we use hooks between 2.5mm and 5mm, but

any size can be used, depending on the thickness of the yarn. Remember that the smaller the hook, the tighter and denser the stitches. Tight, dense stitches are what you want to achieve, though not so tight that they are impossible to work! As a rough guide, hooks sized from 3–3.5mm are suitable for most cashmere-mix or acrylic Aran yarn.

Just to make things a little more interesting, there are US and UK abbreviations for crochet. This book uses the UK name double crochet (dc) rather than the UK single crochet (sc).

Choosing yarn

There are three main choices when considering yarn for Amigurumi projects: colour, weight and yarn type. Beside these important choices, we also look at the practical care of your precious creations.

With children in mind, we have tried to make everything washable and easy to care for, leaving you more time to create more projects. We mainly used Aran-weight yarn in various blends including cashmere and merino wool, acrylic or cotton. These yarns are durable and give a solid finish, which helps the finished toy to hold its shape. These yarn types are twisted, so the strands are less likely to unravel, and they are also easier to work when you are using a small hook.

Colour

There are two main approaches to selecting the right colour yarn for your project: by using contrasting colours, or by using complementary colours. Contrasting colours typically work well for 'bold' projects with large pieces to **make up** and contrast. Complementary colours and softer shades such as pastels work well for more 'delicate' projects and smaller pieces. There are no rights or wrongs, so mix and match as you like to make your work unique.

Colourfastness

It is a good idea to choose a yarn that is colourfast, especially if the finished item is intended for a child. Modern yarn is colourfast, but yarn produced by traditional dyeing methods may not be.

For projects made in multiple shades it is particularly important to test for colourfastness, to ensure that a dark colour will not run into a pale colour. To test, simply wet a piece of the yarn, wrap tightly round a piece of white paper towel and allow to dry. Unwind the yarn, and if the towel has changed colour the yarn is not colourfast and may need to be dry cleaned.

Yarn structure

Yarns are made up of thin strands of spun fibre, twisted together to make up the required thickness. The twist is another important consideration: with some yarns the twist quickly unravels if you make a few mistakes and need to undo and rework. Choose a yarn with a firm twist that is less likely to unravel during the process.

Yarn weight

Yarns are generally classified into different types (see chart). We have mainly used yarns in light and medium weights (DK and Aran) for our projects.

Yarn type

The range of available yarns has grown with new technology, which has allowed different fibres to be spun and twisted into yarn. Different fibres have varying properties, so the various yarns will be suitable for different types of projects.

Wool

This warm, breathable natural fibre is very popular. Most wool yarn comes from the fleeces of sheep but is also produced from the wool of some breeds of goat, llama, camel and rabbit. It is very easy to work and its elasticity is useful if your tension is uneven.

Cotton

This plant fibre is available in varying grades of softness. Cotton is very kind to the skin and is suitable for people with skin allergies. It takes dye well, and produces beautiful strong colours. It also washes well.

Silk

This yarn is produced from the cocoons of various kinds of silk moth. Collecting and spinning the silk fibres is a time-consuming job, hence the high cost of silk yarn. Silk-mix yarns may be a cost-effective alternative.

Mixed fibres

Many different textures and weights of yarn are available in a wide range of fibres that are mixed for their different qualities and properties.

Environmentally friendly

Natural fibre yarns including soya and bamboo are increasingly popular.

Novelty

These yarns are usually spun from man-made fibres, and are often made up of several plies or strands of yarn that are twisted together.

Materials

Apart from yarn and hooks, the craft of Amigurumi requires relatively few materials. Each project will be an individual creation, and the personalisation will come in your finishing touches. Our designs should be regarded as a springboard for your own ideas; with this in mind, these are some of the additional materials you may need.

Stuffing

We used Minicraft Supersoft Toy Stuffing, which conforms to BS1425, BN5852 and EN71 standards and is safe for children. It is washable, can be used in all types of toy making, and is readily available in good craft stores as well as online.

Tapestry needle

These have rounded tips, and will be used to stitch or join the different parts of your Amigurumi. As an alternative to using embellishments, your finished toy may also be embroidered.

Felt

Felt may be used to make eyes and other embellishments for Amigurumi. The advantage of felt is that it is available in a wide assortment of colours, so it is ideal for making your project individual. The disadvantage is that felt may run; if in doubt, check for colour-fastness or use another material. If you want to make a toy that is easily laundered, substitute scraps of any washable fabric as a child-friendly alternative to felt.

Eyes

Many different types of toy eyes are available, including safety eyes that are secured on the inside of the toy using washers, sewn-on eyes and eyes that may be attached using adhesive. Most of the projects in this book use safety eyes, or have eyes embroidered using embroidery thread, because these are the most child-friendly options.

Embroidery thread

You will need an assortment of different-coloured threads to add detail to your work. Amigurumi may be personalised by embroidering features and patterns, and as your confidence increases you will really be able to discover your creative side.

Crochet techniques

Chain stitch

1 With the hook in the right hand and the yarn resting over the middle finger of the left hand, pull the yarn taut. Take the hook under, then over yarn.

2 Pull the hook and yarn through the loop, holding the slip knot steady. Repeat action to form an even chain.

Double crochet

1 Place the hook into a stitch. Wrap the yarn round the hook and draw it back through the stitch towards you; there should now be two loops on the hook.

2 Wrap the yarn round the hook again, then draw it through both loops so there is one loop left on the hook. Repeat across the row.

Magic circle technique

Many crochet patterns begin by working a chain of stitches and linking them in a ring with a slip stitch. This may leave an unsightly hole, depending on how many chain stitches you begin with. For small, neat work like Amigurumi, this is not ideal as it may spoil the look of the finished toy.

A better method is to begin by using the magic circle technique, in which stitches are worked over a loop of yarn. The loop is then pulled taut and fastened off, leaving no hole. The step-by-step photographs below will help you to work your first magic circle.

Making the loop

1 Wrap the yarn around your fingers to form a ring.

2 Insert the hook and pick up a loop of yarn.

3 Take yarn over hook and pull through to form a loop.

Working into the ring

4 Insert the hook into the ring...

5 ...wrap yarn round hook...

6 ... and pull through ring so there are 2 loops on the hook.

7 Wrap yarn round hook again and pull through both loops...

8 ... to complete the first dc.

9 Continue in dc round the ring.

Joining the ring

10 Insert hook into the first stitch.

11 Wrap yarn round hook.

12 Pull through the stitch and the loop already on the hook.

13 Now pull the hanging tail...

14 ... to close the ring.

15 Continue in dc...

16a ... pulling yarn through stitches of previous row...

16b ... and wrapping yarn round hook as before ...

16c ... to increase size of ring.

Changing colours

To ensure a good finish for your creations, it is important to practise changing colours neatly and efficiently.

Begin dc in the normal way by inserting the hook into the stitch, wrapping the yarn round and pulling through.

1 Now wrap the second colour round the hook...

2 ... and pull through both loops of the first colour. Tie yarn ends to prevent them escaping as you work.

3 Using the second colour of yarn, dc into next stitch.

4 Repeat step 3.

5 The completed colour change.

Increasing and decreasing

Decreasing

1 Insert hook into stitch, wrap yarn round and pull through.

2 Insert hook into next stitch, wrap yarn, and pull through.

3 The hook should contain 3 loops.

4 Complete the decrease by wrapping yarn around hook and pulling through all 3 loops...

5 ... to complete the decrease, also known as 2 sts into 1.

Increasing

Work 2 dc into the same stitch.

Amigurumi spirals

Some amigurumi patterns give the instructions in the form of diagrams showing the spirals to be worked. We think it is easier to work from simple row-by-row charts, so you know exactly where you are at any time, and how many stitches on each row.

It is easy to count the number of rows that you have worked on any piece of amigurumi: just count the ridges produced by the rows of double crochet stitches. To determine where a row begins or ends, start with the end of yarn left when making the initial magic circle and count vertically.

are worried about this, you can use a contrast thread or stitch markers to delineate the beginning of the rows.

The illustrations that follow show how the instructions for Zelda Zebra's muzzle and body can be rendered as spiral diagrams.

The art of Amigurumi

THIS BOOK IS THE RESULT OF A HOBBY shared by best friends, Lan-Anh and Josephine. Lan-Anh first discovered Amigurumi as a fun pastime and a way of making gifts for friends, including Josephine's toddler son Lewis.

When Lan-Anh gave Josephine a cute dog she had made, she wanted to make some Amigurumi of her own. As a beginner in crochet she was worried about her chances of success, but it was such fun and so easy that in just two weeks she had learned the basic techniques and was soon making some amazing creatures.

If you struggle to complete your knitted projects – does a sweater without arms sound familiar? – Amigurumi is for you. It can be extremely addictive, and you are so eager to see the result of your efforts that the toys are completed very quickly.

Amigurumi became yet another thing the friends had in common, and they often stayed up until the small hours making toys and planning the next project. Friends and family were so impressed by the results that they could not wait to see the next creation. It was soon clear that Amigurumi was not just for children.

If you love making things but have little time, Amigurumi could be the answer. It is not only easily manageable but very portable: Lan-Anh may make an ear on the train, and legs on the bus! A visit to Japan provided lots of ideas and inspiration for new designs and projects, and the idea for this book was born.

The craze for crocheting cute characters has swept Japan, and now everyone can discover the appeal of the latest art form.

Amigurumi – which literally means crocheted stuffed toy – is fast, fabulous and fantastic fun. The necessary techniques can be learned in minutes, and it's perfect for creative people of all ages.

This gorgeous new title features a range of inspiring designs for quirky and covetable creatures. The instructions are simple to follow and are accompanied by innovative, easy-to-read charts.

- Can be made with only basic crochet skills
- Simple and quick to make
- Use up yarn oddments to create individual colour combinations
- Small and easily portable for the perfect project on the go

Projects include:

- Friendly Frog
- Robbo Robot
- Cupcake Bear
- Sidney Snail
- Pandora Panda
- Baby Bunny
