Turn work right side out and sew up seam which will be inside of ear. With tail from CO end, thread through the CO sts, draw up tight and stitch to hood, see Floppy Puppy Ears.

Bear Ears (make 2)

MC over the CC part in the front while tugging the CC part under and into the fold. Stitch together neatly. Sew the CC part of ear to hood app in the middle of the hood-flap. - use back sts as illustrated.

Lift ear to standing position and fold MC part over the CC part and stitch to hood as illustrated for the bear ear.

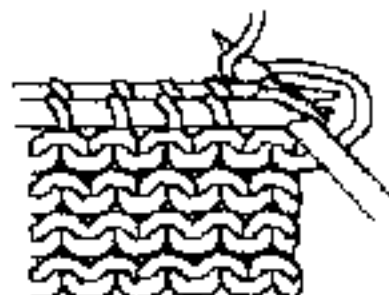

Helpful Hints

Kinc: K st, then insert the left ndl into the previous rows knitted st (2 rows below) and knit into the back. This makes the tightest increase and looks best on 3-dimensional creations. The knitting terminology is 'left invisible increase'.

Binding 2 pieces together is done the following way: using 3 ndis, knit the first 2 parallel sts together. Knit the next 2 parallel sts together and slip the first st on the right ndl over the 2nd st. Continue until all sts are bound off.

M1

M1 is a backward loop which can be knit or purled as is on following row. You may replace the YO from tubular knitting with M1.

Weaving

Sew as illustrated.

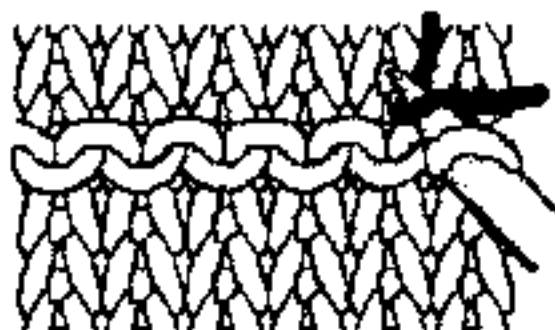

Pull yarn tight for each st.

CO at end of row. Work backward loops as shown.

PU-g

Knit into garter loop as illustrated. Work is held opposite of knitting direction.

Wrap and YO

The wrap is used to cover the holes which are created when work is turned for shaping darts and in this case the lower half of the sleeper.

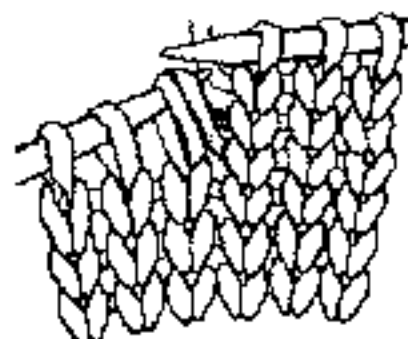

wrap before turn

Lift the wrap and K the wrap and st together.

A YO will work the almost the same and is much simpler, use your own preference. The yarn can be wrapped before or after you turn, whatever works best for you. The difference between the YO and the wrap appears when you are reaching the turn and need to close the hole. A wrapped st must be picked from it's wrapped position and then knitted together with the st it was wrapped around. A YO is just in FRONT of the st with which it must be knit together.

K the YO and next st together.
