BABY KNITTING

FOR BEGINNERS

gay,
comfortable
DESIGNS
with detailed
INSTRUCTIONS
easy to **KNIT**
and **CROCHET**

You hesitate to use a crochet hook...
you don't think you're clever enough
with knitting needles...
This book will prove otherwise.

Is there a greater joy for a mother than being able to make
things for her baby...
tiny cardigans, soft covers?

However, many young women lack
the confidence to attempt such things.

The aim of this book is to help you overcome
the difficulties which beset beginners.

All the models were designed to be easily and successfully made,
following our instructions.

Each garment has a simple stitch and shape, and
is easy to make up, but remains just as pretty.

You will be agreeably surprised to find that,
whether working with needles or a crochet hook,
"it's not so difficult after all..."

what you must know

If you have not done any knitting or crochet since you were a little girl, and your memory of the technical terms is a bit hazy, a short revision is necessary before beginning your first garment, particularly, familiarise yourself with the following:

1. The "Knitting Alphabet" or terms used.
2. The abbreviations used in the instructions.
3. The best way to read a knitting or crochet pattern.
4. The importance of correct tension.

knitting alphabet.

ASTERISK

This is a small star * used to denote beginning and end of sequence of stitches in a pattern to be repeated.

CASTING OFF

This is done to finish the work, and is also used during course of work.

CASTING ON

This is the collection of stitches made on a needle at beginning of work.

In **knitting**: For the first stitch form a slip knot with the loop on left needle. Insert right needle into loop, pass yarn round needle, pull loop through on right needle and slip it on left needle thus forming a second stitch. Continue in this manner for required number of stitches.

In **crochet**: Form a slip knot with the loop on crochet hook, pass yarn over hook and pull a loop through thus forming one chain. Continue thus for number of required chain, leaving one loop on hook at end of chain.

DECREASING

A decrease in course of a row is usually made by working 2 stitches together. To decrease a number of stitches at each end of row:-

In **knitting**: Cast off number of required stitches at beginning of a row.

In **crochet**: Leave unworked required number of stitches.

DROPPED STITCHES

If a stitch is dropped and the knitter (usually a beginner) does not notice it until 3 or 4 rows have been worked, it can be picked up using a crochet hook, forming a stitch by hooking the horizontal thread through the loop on each row, placing the last loop on knitting needle in its correct position in row.

EDGE STITCHES

These form an edge similar to a selvedge in material. An edge stitch is the first or last stitch in a row and is formed when turning from one row to the next.

INCREASING

An increase is an extra stitch made in course of work. The method used is usually stated in the pattern.

Certain patterns, such as those for kimono sleeves call for a number of increased stitches at each end of row...

In **knitting**: by casting on the required number of stitches before beginning a row.

In **crochet**: by making a chain of the required number of stitches at end of row, and on the next row work on these stitches as for stitches of previous row.

JOINING

two threads of yarn. Always join new ball of yarn at beginning of a row.

LEAVE STITCHES

Stitches left unworked for time being, for example, at one side of neck edge, whilst the other side is being worked. Then the unworked stitches are afterwards picked up and worked to correspond...

In **knitting**: Slip the unworked stitches on a spare needle, or better still, on a stitch-holder (a large safety-pin type of needle).

When picking up the stitches from stitch holder be careful not to twist the stitches.

In **crochet**: Do not work on the stitches where instructions state "leave unworked"

LOOP

This is the term used in crochet for a stitch formed by pulling thread through on hook.

PATTERN

can be either the whole model, or the instructions for a design made on a certain number of stitches and rows which are usually repeated.

PICK UP AND KNIT

This consists of knitting into either the side edge stitches, the bottom edge stitches etc. of knitted fabric to continue the work.

ROWS

In **knitting** the first row is worked on cast-on stitches and forms the right side of work.

In **crochet** : the first row is worked in the foundation chain. Thus the odd-numbered rows form the right side, and the even-numbered rows the wrong side of work.

SLIP OR PICK UP A STITCH

Slip a stitch from one needle to the other

YARN OVER NEEDLE (OR HOOK). Bring yarn over or all round needle or hook.

sizes

Size 2 (3 to 6 months) Directions for size 1 (Birth to 3 months) and size 3 (6 months to 1 year) are given in brackets.

materials

100 grs. 4-ply babywool in pink.
1 pair of size 11 needles. Stitch holder.

stitches used

(1) Stocking stitch - **1st. row:** Knit.
2nd row: Purl. Rep. these two rows.
(2) Garter Stitch - Every row: Knit.

tension

29 stitches and 38 rows to 4 inches
in stocking stitch
29 stitches and 52 rows to 4 inches
in garter stitch.

method

The front and backs are made in one piece. Beginning at bottom of front cast on 72 (68:76) sts. and work in garter st. for 18 rows. Change to st.st. and work straight until measurement is 7 (6 1/4:8) ins. from beg. Then work the centre 38 (36:40) sts. in garter st. and the other sts. in st.st. and on the 12th of these rows cast off

centre 24 (22:26) sts., leave the 24 (23:25) sts. at right on a st. holder and work on the 24 (23:25) sts. at left, working the 7 sts. at right edge in garter st. and the other sts. in st.st. for 10 rows. Then cast on 31 (29:33) sts. at right edge and work for 12 rows, working the 38 (36:40) sts. at right in garter st. and the other sts. in st.st. When these 12 rows are completed work in st. st. with the 7 sts. at right edge in garter st. (for border) and when 6 1/4 (5 1/2:7) ins. from where the 31 (29:33) sts. were cast on is completed, work on all sts. in garter st. for 17 rows, then cast off. Go back to the sts. on st. holder and complete this side to correspond with the other side.

sleeves

With right side of work facing you, pick up and knit 1 st. in each of the 55 edge sts. at centre of right side of body and work in garter st. for 56 rows. On next row decrease 18 sts. in course of row thus: * K.1, K.2 tog. * rep. * to * 17 times more, K.1. then work in garter st. for 9 rows. Cast off loosely. Make the second sleeve in a similar manner, picking up the centre 55 sts. along left side edge of body. Sew sleeve seams.

5 hints for beginners

KNOW HOW TO READ OUR INSTRUCTIONS

1. **We never mention selvedge stitches in our patterns**, but they are always included in the measurements. You will therefore find it useful to add one or two stitches at each side (for fine seams) **and as many as three for thick yarn, and work these stitches in garter stitch**. The making-up will thus be much easier, and the seams much neater.
2. The stitches given **between two asterisks** are those which go to make up a repeat of a pattern, and are repeated in the same order as many times as possible to the end of the row.
Selvedge stitches and other stitches which it is sometimes necessary to add for the symmetry of the pattern, are given **outside the asterisks**, either before or after. These stitches **are worked once only and should never be repeated**.
3. When knitting, **a row refers to the number of stitches on one needle**.
Working back on the wrong side forms the second row. When working with a circular needle or with four needles, one round is equivalent to one row. The casting-on of the stitches does not count as a row. Thus, **the first row is that knitted in the cast on stitches**, and is, unless otherwise stated, the first row on the right side. All un-even numbered rows are on right side of work and all even numbered rows are on wrong side of work.
4. We must stress **the importance of the sample square**, as it enables you to check whether your knitting corresponds with the tension we give at the beginning of our patterns, and if necessary to make the correction which will permit you **to follow the instructions** without any problems and to make the garment to the size you have chosen. If your sample is smaller than ours, then you are knitting tightly. Work another sample using a size larger needles. If your sample is larger than ours, you are knitting loosely. Work another sample using a size smaller needles.
5. Before starting a pattern, **read through the whole of the instructions very carefully**, so that you understand all the different phases.
Practise with a sample any part of the instructions which seem a little complicated, such as decorative decreases, fancy stitches worked on a stocking stitch background, and anything else which is not part of basic knitting technique.

How to take your measurements

- AB** Shoulder width across front
CD Shoulder width across back
EA Length of shoulder
F Bust measurement
G Waist measurement
H Hip measurement
EI Length to front waist
JK Length to back waist
LM Skirt length at front
KN Skirt length at back
AO Outside sleeve measurement
P Arm measurement
Q Wrist measurement
RS Inside leg (for trousers)
GT Outside leg (for trousers)
U Thigh measurement.

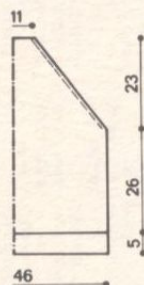

For perfect knitting and crochet results

a) THE TENSION SAMPLE

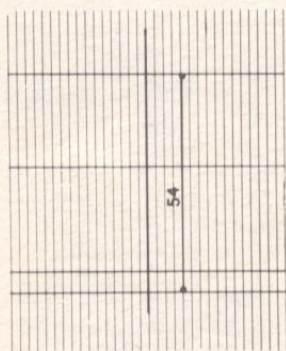

Work a sample square 4" by 4" and compare it with the tension given in our pattern. If yours differs from ours, change your needles or crochet hook.

b) THE PAPER PATTERN

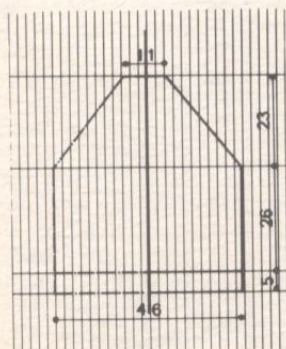

(this is essential for crochet patterns)

1. Use large sheets of squared paper.

2. In black, reproduce life-size the small sketch given with our pattern, and using our measurements.

3. In red correct this drawing to match your measurements.

useful hints

IN KNITTING AND CROCHET

Begin a ball of yarn from the centre of the ball and you will find it unwinds smoothly and regularly.

IN KNITTING

To obtain a neat side edge, when working in pattern, always slip the first stitch knitwise and knit the last stitch in each row.

IN KNITTING

If you find you work one row tighter than the next row, use a size larger needle to work the row which you work tighter, and you will find the fabric is more even.

IN KNITTING

When counting garter stitch rows remember to count each ridge on the right side as 2 rows.

be sure to study the instructions

When choosing a pattern note whether it is for Knitting or for Crochet, and does it give the size you require. In the table of sizes below you will be able to find out if your baby corresponds to size 1, 2 or 3.

table of sizes

This table shows average chest measurement and weights of each size from birth to 3 years and will enable you to choose the right size of the garment you are going to make according to the measurement and weight of your baby.

SIZE	AGE	CHEST	WEIGHT
1.	Birth to 3 months	16 inches	7 lbs
2.	3 to 6 months	18 inches	13 1/2 lbs
3.	6 to 12 months	20 inches	18 lbs
4.	12 to 18 months	22 inches	23 1/2 lbs

Read through the instructions carefully before buying the necessary materials — Knitting needles, crochet hook, wool, etc. Especially if you are a beginner, take particular note of the thickness of the yarn, the needles or the hook. Work a sample square 4 inches by 4 inches in the stitch given in the instructions; work neither too tightly nor too loosely and press if necessary according to the directions given with ball of wool.

In **Knitting**: Cast on the sts. in the way you find the easiest.

In **Crochet**: For the foundation chain use a size larger hook than the one named in the pattern to avoid a tight edge. For the rest of the work use the size of hook as given in the instructions. The stitches used in this book are the classic stitches used in knitting, i.e. garter stitch, stocking stitch, K.1.P.1. rib and K.2.P.2. rib., and in crochet, slip-stitch, chain, double crochet, half-trebles and trebles.

IN KNITTING AND CROCHET

When re-starting your work after an interruption, to ascertain if the next row is a right side row, the length of yarn at the beginning of the cast-on or foundation row is always on the left side when the right side or work is facing you.

IN KNITTING AND CROCHET

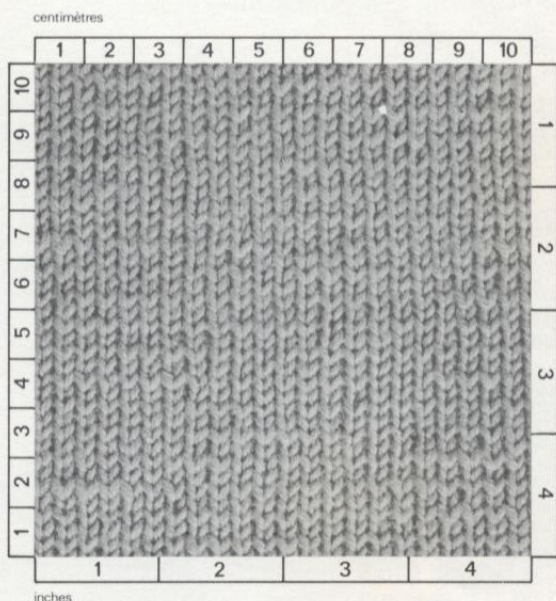

When the instructions state "finish other side to correspond" just reverse the shapings given in the instructions for the first side.

IN KNITTING AND CROCHET

When making up baby garments to avoid a thick seam, sew the seam with a fine oversewn seam.

tension

We must stress the importance of tension. It enables you to check that your style of knitting or crochet compares with the tension given in our instructions. Thus, when checked and corrected, if necessary, with the tension given, you will have no difficulty in producing a garment to the size and shape of the model chosen. If your sample tension square is smaller than ours, it proves your work is too tight, so make another square using larger needles or hook. If your square is larger than ours this proves you work too loosely, so make another square using finer needles or hook.
