KNITTING STITCH EMBROIDERY

1. When working from right to left, bring the needle out in the centre of the stitch and take it up and around the head of the stitch from right to left (under the stitch above) as shown.

2. Take the needle back through the centre of the original stitch and out through the centre of the stitch on the left.

3. When working from left to right, bring the needle out in the centre of the stitch and take it up and around the head of the stitch from left to right (instead of from right to left).

STEM STITCH

Stem stitch is worked from left to right, taking small sts across. Always keep the thread below the needle (refer illustration).

MATTRESS STITCH

This seam will give your garment a professional finish. Even if you have always used backstitch or oversewn seams, try this method and you will be surprised how easy it is and how much better the seams look and feel.

Mattress stitch should be worked one whole stitch in from the edge. It can even be worked on shaped edges - as you are working from the right side, it is easy to see where you are and to keep the seam neat and straight.

When starting, leave a long end which can be secured by running it back along the edge when the seam is completed. If the seam needs to be undone, simply pull this end, drawing the yarn through the stitches.

1. With right side facing you, lay the two pieces to be joined flat and edge to edge. Thread a knitters needle and insert the needle between the edge stitch and the second stitch on the first row. Pass the needle under two rows, then bring it back through to the front.

2. Return to the opposite side and, working under two rows at the same time throughout, repeat this zigzag action always taking the needle under the strands that correspond exactly to the other side, and going into the hole that the last stitch on that side came out of, taking care not to miss any rows. The mattress stitch stitching should be elastic without being loose - while working keep yarn held firm, not pulling sts too tightly.
