All Sizes—Thread ribbon through row of h.tr. around yoke and sleeves.

SOME IMPORTANT HINTS

CROCHET TENSION TEST

Before you start your garment, take the yarn and hook specified in the instructions and make a chain 4 or 5 inches long. Work 1 square in whatever stitch is mentioned in the Tension paragraph of your instructions. With pins, mark out the number of stitches (or patterns) and rows quoted in the Tension. With an inch tape, measure the distance between the pins and compare with the tension given in the instructions. If your tension is too loose (i.e., if the piece measures more than the measurement given), try a size finer hook. If your tension is too tight (i.e. if the piece measures less than the measurement given), try a size larger hook. If more than one size of hook is recommended in the instructions and you have altered your hook to correct the tension, corresponding alterations must be made to hooks throughout the instructions.

ABBREVIATIONS used in CROCHET

Ch.—chain. sp.—space. s.c.—single crochet. sl.st.—slip stitch. d.c.—double crochet. y.o.h.—yarn over hook. h.tr.—half treble—pass yarn round hook, draw a loop through next ch., draw a loop through all 3 loops on hook. tr.—treble—pass yarn round hook, draw a loop through next ch., draw a loop through first 2 loops on hook, then draw another loop through 2 remaining loops. d.tr.—double treble—pass yarn twice round hook, draw a loop through next ch., draw a loop through first 2 loops on hook, draw a loop through next 2 loops, then another through last 2 loops. t.tr.—triple treble—pass yarn three times round hook, draw a loop through next ch., draw a loop through first 2 loops on hook, draw a loop through next 2 loops, then another through next 2 loops, then another through last 2 loops.

CRAB STITCH

PRESSING CROCHET

It is not necessary to press most crochet stitches, as pressing tends to flatten the appearance of the stitch. However, if pressing should be necessary, this should be done very carefully, from the wrong side of the work. Use a damp cloth and warm iron, and do not let the full weight of the iron fall on the garment—steam, rather than press. **Synthetic yarns should not be pressed at all.**

Variations in specified yarn quantities for garments

Knitters occasionally comment that the quantity of yarn recommended for a garment varies from the amount they actually use. One major reason for this is that no two people knit in exactly the same way.

When we specify a quantity of yarn for a particular garment, we are stating a figure that is the end result of having each individual design made by as many as six different knitters. The average quantity determined by this check knitting is regarded as the most satisfactory figure for that particular garment, knitted at the **correct tension*** to the measurements specified and in the actual yarn recommended. Naturally, if you decide to change the body or sleeve length **you must allow for adjustment to the quantity of yarn.**

***Correct tension** — see tension instruction for each garment.
