SOME IMPORTANT INFORMATION

Avoid disappointment — buy the wool recommended. Buy wisely — buy enough — the same blend cannot be repeated.

HOW TO CHECK YOUR TENSION—Before you commence knitting, check your tension carefully; on this depends the success of the finished article. Take the wool and needles specified in the instructions, cast on 20 stitches, work 20 rows in plain smooth fabric. Lightly press work. Check the tension by placing an inch tape across the stitches, count the exact number of stitches to one inch and compare with the tension given in the instructions.

GRAFTING — Plain, smooth fabric only

This is the method by which two pieces of knitting are joined together to avoid a seam.

Divide the stitches equally on two needles, with the wool at one end and with the right side of the work facing. Break off the wool, leaving a length of several inches, and thread this through a wool needle. * Inserting the wool needle, as if for knitting, into the first stitch of the front needle, draw it through the stitch and slip the latter off the needle; inserting the needle, as if for purling, into the second stitch of the front needle, draw the wool through and let the stitch remain on the needle, taking the wool under the front needle and inserting the wool needle, as if for purling, into the first stitch of the back needle, draw the wool through this

stitch and slip the latter off the needle; inserting the needle as if for knitting, into the second stitch of the back needle, draw the wool through and let the stitch remain on the needle; bring the wool forward under the needle and repeat from * until all the stitches are worked off, darning in the end of the wool securely when finished.
