IMPORTANT

Check your tension carefully before starting your garment. It is essential to work to the stated tension. Knit a square of at least 15cm and measure in the centre, without stretching, to see if you have the correct number of stitches and rows. If necessary change needle size in order to obtain stated tension. If you have too many stitches use a larger needle, too few use a smaller needle.

Phildar cannot accept responsibility for any garment if yarn other than that specified is used or if the tension is incorrect.
