THE KNITTING PATTERNS

The designs in this magazine are all sized according to Kim's original inspiration and are graded accordingly. All of the garments are photographed on the correct size child; to help you to decide which size to knit we have numbered the sizes throughout the magazine to help you translate garments with the correct fit onto your child. To facilitate this there is a size diagram included with each pattern which shows not only the finished garment length and width but will also enable you to calculate the crucial centre-back to cuff measurement needed to ensure a perfect fit.

INFORMATION PAGE

TENSION

Obtaining the correct tension is perhaps the single factor which can make the difference between a successful garment and a disastrous one. It controls both the shape and size of an article, so any variation, however slight, can distort the finished look of the garment. No-one wants to spend hours and hours making a "skinny rib" when they really want a "sloppy Joe".

Within each pattern there may be different tensions given, for instance, if either **Intarsia** or **Fairisle** techniques and **stocking stitch** are used in the same design. We strongly advise that you knit a square in pattern and or stocking stitch (depending on the pattern instruction) of perhaps 5 - 10 more stitches and 5 - 10 more rows than those given in the tension note. Place the finished square on a flat surface and measure the central area. If you have too many stitches to 10cm try again using thicker needles, if you have too few stitches to 10cm try again using finer needles. Once you have achieved the correct tension your garment will be knitted to the measurements given in the pattern.

SIZE NOTE

The instructions are given for the smallest size. Where they vary, work the figures in brackets for the larger sizes. One set of figures refers to all sizes. For ease in reading charts it may be helpful to have the chart enlarged at a printer and then to outline the size you intend to knit on the chart.

CHART NOTE

Many of the patterns in the book are worked from charts. Each square on a chart represents a stitch and each line of squares a row of knitting. When working from the charts, read odd rows (K) from right to left and even rows (P) from left to right, unless otherwise stated. Each colour used is given a different symbol or letter and these are shown in the **materials** section, or in the **key** alongside the chart of each pattern.

KNITTING WITH COLOUR

There are two main methods of working colour into a knitted fabric: **Intarsia** and **Fairisle** techniques. The first method produces a single thickness of fabric and is usually used where a colour is only required in a particular area of a row and does not form a repeating pattern across the row, as in the fairisle technique.

Intarsia: The simplest way to do this is to cut short lengths of yarn for each motif or block of colour used in a row. Then joining in the various colours at the appropriate point on

the row, link one colour to the next by twisting them around each other where they meet on the wrong side to avoid gaps. All ends can then either be darned along the colour join lines, as each motif is completed or then can be "knitted-in" to the fabric of the knitting as each colour is worked into the pattern. This is done in much the same way as "weaving-in" yarns when working the Fairisle technique and does save time darning-in ends. It is essential that the tension is noted for **Intarsia** as this may vary from the stocking stitch if both are used in the same pattern.

Fairisle type knitting: When two or three colours are worked repeatedly across a row, strand the yarn **not** in use loosely behind the stitches being worked. If you are working with more than two colours, treat the "floating" yarns as if they were one yarn and always spread the stitches to their correct width to keep them elastic. It is advisable not to carry the stranded or "floating" yarns over more than three stitches at a time, but to weave them under and over the colour you are working. The "floating" yarns are therefore caught at the back of the work.

ALL ribs should be knitted to a firm tension, for some knitters it may be necessary to use a smaller needle. In order to prevent sagging in cuffs and welts we suggest you use a "knitting-in" elastic.

PRESSING

After working for hours knitting a garment, it seems a great pity that many garments are spoiled because so little care is taken in the pressing and finishing. After darning in all the ends, block each piece of knitting. Press each piece, except ribs, gently, using a warm iron over a damp cloth. Take special care to press the edges as this will make the sewing up both easier and neater.

FINISHING INSTRUCTIONS

When stitching the pieces together match the colour patterns very carefully. Use a back stitch for all main knitting seams and an edge to edge stitch for all ribs unless otherwise stated.

Join left shoulder seam using back stitch and neckband seam (where appropriate) using an edge to edge stitch.

Sleeves

Set-in sleeves: Set in sleeve easing sleeve head into armhole using back stitch.

Square set-in sleeve: Set sleeve head into armhole, the straight sides at top of sleeve to form a neat right-angle to cast off sts at armhole on back and front, using back stitch.

Shallow set-in sleeves: Join cast-off sts at beg of armhole shaping to cast-off sts at start of sleeve-head shaping. Sew sleeve-head into armhole, easing in shapings.

Straight cast-off sleeve: Place centre of cast off edge of sleeve to shoulder seam. Sew in sleeve using back stitch using markers as guidelines where applicable.

Join side and sleeve seams using back stitch. Slip stitch pocket edgings and linings into place.

Sew on buttons to correspond with button-holes.

After sewing up, press seams and hems. Ribbed welts and neckbands and any areas of garter stitch should not be pressed.
