ESSENTIAL INFORMATION

Tension

Please take a little time to knit a tension square of the size indicated for the design you are working. If it's smaller your tension is tight and the garment will be small when completed. If it's bigger your tension is loose and the garment will be big when completed. Knitting a garment at an incorrect tension will produce disappointing results and may well require a different amount of yarn than we specified. Try another tension square on a bigger needle if your first square was small, or smaller needles if your first square was big. When your square measures 10cm, (4in) begin knitting the garment on the needles you used for this square. If you have had to change your needle size, remember that if the design uses more than one size of needle you will need to adjust each needle size.

Sizing

Instructions are given for the first size. The figures within the brackets refer to the larger sizes. Where only one figure is given this applies to all the sizes.

Yarn amounts

The yarn amounts given for each design are based on average requirements when using the correct yarn and tension.

Finishing your garment

When sewing up your garment please take care and a little bit of time to follow the instructions given with each design. We suggest that you use mattress stitch for vertical seams and the grafting technique for horizontal or shoulder seams shown below to give it a neater finish.

Joining horizontal or shoulder seams.

1.1 Lay the pieces to be sewn edge to edge. Starting at the right hand side of work bring the needle up through the centre of the first stitch of the lower piece as shown in diagram 1.1.

1.2 Pass the needle under both strands of the first stitch of the upper piece (emerging between the first and second stitches of the upper piece) as shown in diagram 1.2.

1.3 Then take the needle back into the centre of the first stitch on the lower piece and emerging up through the centre of the next stitch to the left as shown in diagram 1.3.

* On the upper piece take the needle down behind the first two strands of the next stitch to the left. Then crossing to the lower piece take the needle down through the centre of the last stitch worked emerging through the centre of the next stitch. * Repeat from * to * to end.

Diagram 1.4 shows a finished seam, with the dark thread representing the stitched row.

These examples show stocking stitch pieces sewn together, but the principle is the same for any knitted fabric.

Joining vertical seams (i.e. side or sleeve seams)

Mattress stitch

With right side of work facing lay the two pieces to be joined flat and edge to edge. Working from the front and either one stitch or half a stitch in from the edge on each piece, depending on what fabric you are sewing together, insert the needle from the front through the centre of stitch sliding it under two rows as illustrated in 1.5, 1.6 and 1.7. (We recommend that you take a full stitch from each side when joining garter stitch and moss stitch, but only half a stitch when joining stocking stitch or ribbed patterns). Cross to the opposite piece of work and slide the needle under two rows at a time. Repeat this action. Make sure that you don't miss any rows and that the work matches at both sides.

Once the garment is complete place a damp cloth over a thick towel. Place the garment onto the damp cloth. Pin out the garment to the measurements given, making sure that enough pins are used so that the outline of the garment remains smooth. Cover with damp cloths and leave to dry naturally.

Washing Instructions

Check the ball band for the washing instructions. After washing reshape while still wet and dry flat away from direct heat.

SUBLIME™ CANNOT ACCEPT RESPONSIBILITY FOR THE RESULT OF USING ANY OTHER YARN.
