Remember, two things are vitally important for the success of your Villawool design. Firstly, you **must** use the yarn specified. Secondly, your tension must be exactly as stated in instructions.

THE IMPORTANCE OF TENSION

Before commencing garment always knit a sample 10 cm (4 in.) square in the pattern stitch. Place a pin each side of number of stitches required for correct tension (see tension instructions) then measure stitches between pins with a tape measure. If less stitches than required use smaller needles, if more stitches use larger needles.
