Similarly the helmet on page 6 : to make it a size larger knit it with no. 10 and 11 needles and make the depth 4 inches instead of 3½ inches before shaping the back. To make the bonnet on page 7 a size larger use no. 10 needles and work in pattern for 11½ inches instead of 11 inches.

On tension :

which is rather important. Most knitters know if they tend to be "loose knitters" or "tight knitters" and make automatic adjustments to compensate. If they didn't their knitting would never be correct for measurement !

Testing tension is quite simple, however. Measure off one inch on your fabric and mark it with a pin at each end, then count the stitches between the pins. If you have too many stitches, try using needles one size larger than those recommended in the instructions. If there are too few, use needles a size smaller.
