Dear Reader,

Baby clothes have never been so varied and so flexible as today. Classic garments like complete pram outfits consisting of jumper, cardi, trousers and dress and complemented by booties, hats and mitts in shades of pastels are just as much in demand as cheerfully bright models with interesting patterns, or those decorated to kiddies' taste with decorative picture motifs. Frequently things are highlighted even more by lovingly embroidered flowers or pretty bands with animal motifs. All this has been included in our fashion knitwear for babies and tiny tots. We hope that we've included the design of your choice too.

After another 6(7) cm dec at left edge 1 st. on every 4th row twice, and 1 st. on every 2nd row twice = 25 sts. When work

measures 4 cm from start of hood shaping cast off all sts.

Twisting colours

Front of work

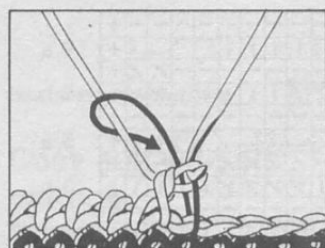

Twist yarns at back of work to prevent holes from forming

Back of work

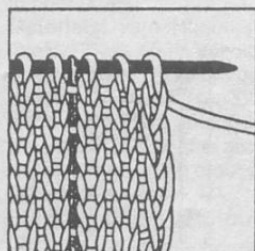

Crab stitch

for neater edges on knitwear and crochet:

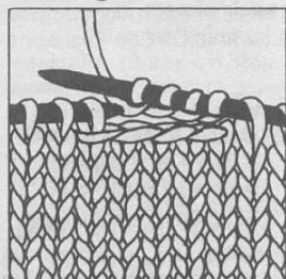

With a crochet hook pick up the bar of the stitch of the front row as shown by the arrow, bring the hook through as shown, then yarn-over and bring this loop through both loops on the needle together.

Marking rows

To mark a row thread a differently coloured yarn (preferably a slightly thinner one than that being used to make up the garment itself) through the eye of a tapestry needle and weave through the row, working alternately under and over the stitches to match the pattern.

Making buttonholes

There are two ways of making these. One is to cast off the given number of sts. on one row and then to cast on the same number of sts. again on the next. Alternatively, cast off the given number of sts. but without working them (as shown above) and casting them straight back on again.

And now make a start!

Never forget your tension swatch!

Always work a tension swatch or sample before starting work. This will save you hours of frustration later on. The sample should be worked in the basic pattern of the garment itself and should be at least 15 x 15 cm square. Then make yourself a template with a "window" 10 x 10 cm square. Place this on top of your sample and you will easily be able to count out the stitches and rows. If your sample is smaller than that given in the instructions, you will have to work with larger (thicker) needles; if it is bigger, use smaller (thinner) needles. But most important of all, do make sure that you use the yarn recommended in the instructions - or at least alternative yarn that is very similar in consistency and in length.
