INTRODUCING THE JELLY BABIES

BABY BONNY

She is the youngest of the six. She always wears both a nappy and pink bonnet with nine frills. She is the ultimate loving and lovable baby. She is never seen standing or walking but always crawls on all fours and occasionally sits. She is constantly crawling into trouble, just because she doesn't know what trouble is. All the other babies look after her.

BOOFULS

He has a kiss curl and wears blue shorts and blue shoes with laces. He is always crying, whether it is because he is happy or sad. He is a very endearing character which makes people want to protect him like you would a younger brother or sister.

BUMPER

He wears a green bum bag and green shoes. He is naughty yet at the same time cheeky and adorable, which is reflected in his mischievous grin. He is very clumsy and is always bumping into things and falling over. He is therefore often falling down or sitting.

BUBBLES

She has a fringe and a ponytail which is tied with a red bow with white spots. She wears a red beaded necklace. Her shoes are red with white toes. She has pretty ears and nose. She is very happy, which is reflected by her always giggling and laughing. She is an unfailing optimist and sees the bright side of any situation. She is an extrovert and always teases the other Jelly Babies.

BIG HEART

He has a fringe and wears red trainers with a white star in a black circle on sides and a purple 'heart' on the left side of his chest. This reflects his generous and caring character. He is the thoughtful Jelly Baby making sure the others are happy and taken care of.

BRILLIANT

He always wears a red cap and a red 'B' appears on his chest. He wears green baseball boots. He is leader of the Jelly Babies. He is very active and energetic and is good at most things – a real winner, although he is not arrogant or boastful. As the leader he is always planning and doing exciting things.

FAIR ISLE

For this technique the colors not in use are carried loosely across on the wrong side of work so as not to distort the shape of the stitches being knitted.

1. On a knit row, hold the first color in your right hand and the second color in your left hand. Work as normal with the first color, carrying the second loosely across the wrong side of work.

2. When the second color is required, insert the right hand needle into the next stitch and draw a loop through from the yarn held in the left hand, carrying the yarn in the right hand loosely across the wrong side until next required.

3. On a purl row, work as usual with the first color held in the right hand, holding the second color in the left hand.

4. To purl a stitch in the second color insert the right hand needle into the next stitch purlwise and draw loop through from the yarn held in the left hand.

If there are more than 6 stitches worked in one color, cross the yarns over each other on every 3rd or 4th stitch to avoid long, loose strands.

If you find it awkward to hold the yarns in both hands, simply work as usual, dropping the yarn not in use and picking it up again when required, making sure that it is not pulled across the wrong side. Always carry the same color across the top throughout the row for a neat appearance on the wrong side, and to avoid the yarns becoming twisted.

KNITTING STITCH EMBROIDERY

1. When working from right to left, bring the needle out in the centre of the stitch and take it up and around the head of the stitch from right to left (under the stitch above) as shown.

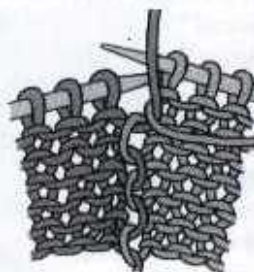

2. Take the needle back through the centre of the original stitch and out through the centre of the stitch on the left.

3. When working from left to right, bring the needle out in the centre of the stitch and take it up and around the head of the stitch from left to right (instead of from right to left).

COLOR TWIST

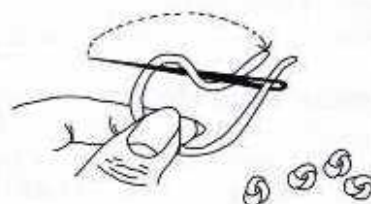

Work to the color change, then making sure both yarns are at the back, drop the first color, pick up the second color and bring it around the first color to cross the yarns over before working the next stitch.

On a wrong side row, make sure both yarns are at the front (wrong side) of the work. Drop the first color, pick up the second color and bring it around the first color before working the next stitch. This technique ensures that the yarns are crossed on every row, and gives a neat, unbroken vertical line on the right side.

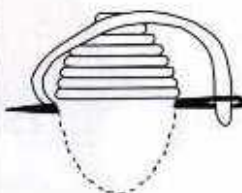

FRENCH KNOTS

Bring the needle from the back to the front of the work and wind the yarn several times around the needle according to the size of the knot required. Take the needle back through the same place and draw the yarn through, thus forming a small knot on the right side. If the knot tends to slip through to the wrong side, insert the needle half a stitch further on to avoid this.

STEM STITCH

This is a continuous line of stitches, worked from left to right in a similar way to backstitch. Each stitch overlaps the previous one by approx half its length.

SATIN STITCH

This is used to completely cover an area of knitting without duplicating stitches.

HOW TO ATTACH HAIR.

Fold yarn in half and draw the folded end through the doll at hairline, using a crochet hook. Draw the loose ends of yarn through the loop, and draw up firmly to form a knot.

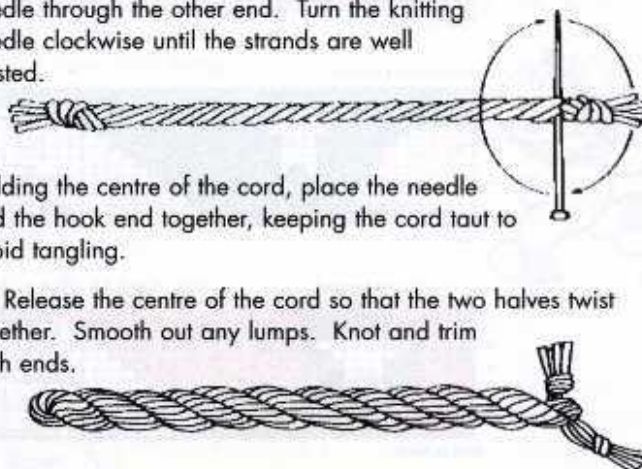

TO MAKE A TWISTED CORD

1. Cut the required number of strands of yarn 2 - 3 times the length of the finished cord. eg. 4 strands of yarn 100cm long will produce a cord 8 strands thick and approx 40cm long. Knot the strands together at each end, making sure all lengths are equal.

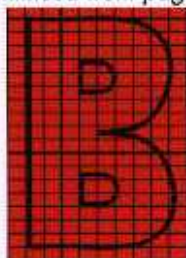

2. Attach one end to a pin, hook or handle, insert a knitting needle through the other end. Turn the knitting needle clockwise until the strands are well twisted.

3. Holding the centre of the cord, place the needle and the hook end together, keeping the cord taut to avoid tangling.

4. Release the centre of the cord so that the two halves twist together. Smooth out any lumps. Knot and trim both ends.
