How to Check Your Tension

Before you knit these designs check your tension carefully. Take a pair of No. 10 needles, cast on 14 stitches and work in st.st. for 19 rows. Cast off; press lightly on wrong side. The knitted square should measure 2 inches each way. If the square is bigger your work is too loose; try a size finer needle. If it is smaller your work is too tight; try a size coarser needle. If you knit to the correct tension in st.st. you will knit naturally to the correct tension for any stitch in this booklet. If you alter the needles to obtain the correct tension in st.st. corresponding alterations must be made to the needles throughout.
