A young child with light-colored hair is shown in profile, looking to the left. They are wearing a brown tweed waistcoat with a wide shawl collar and a matching brown tweed beret. Underneath the waistcoat, a red, white, and black plaid shirt is visible. The child is standing outdoors, with a white railing and a wooden fence in the background. The text 'Tweed Waistcoat and Beret see page 44' is printed in the upper right corner.

NOTES

Figures for larger sizes are given in () brackets. Where only one figure appears, this applies to all sizes.

Work figures given in [] brackets the number of times stated afterwards, or the resultant number of stitches.

Where 0 appears no stitches or rows are worked for this size.

The yarn amounts given in the instructions are based on average requirements and should therefore be considered approximate. It is always best to use the yarn recommended in the instructions. Addresses for Rowan Yarns are given on page 80. If you want to use a substitute yarn, choose a yarn of the same type and weight as the one recommended. The following descriptions of the various Rowan yarns are meant as a guide to the yarn weight and type (i.e. cotton, mohair, wool, etcetera). Remember that the description of the yarn weight is only a rough guide and you should always test a yarn first to see if it will achieve the correct tension (gauge).

Cotton Glace: a lightweight cotton yarn (100% cotton) approx 112m/123yd per 50g/1½oz ball

Designer DK: a double knitting (US worsted) weight yarn (100% pure new wool) approx 115m/125yd per 50g/1½oz ball

Donegal Lambswool Tweed: a 4-ply (US sport) weight yarn (100% pure new wool) approx 100m/109yd per 30g/1oz hank

Handknit DK Cotton: a medium weight cotton yarn (100% cotton) approx 85m/90yd per 50g/1½oz ball

Wool and Cotton: a 4-ply (US sport) weight yarn (50% superfine botany wool/50% Egyptian cotton) approx 120m/131yd per 40g/1½oz ball

TENSION

Each pattern in this book specifies tension – the number of stitches and rows per centimetre (inch) that should be obtained on the given needles, yarn and stitch pattern. Check your tension carefully before commencing work.

Use the same yarn, needles and stitch pattern as those to be used for main work and knit a sample at least 12.5 x 12.5cm/5in square. Smooth out the finished sample on a flat surface but do not stretch it. To check the tension, place a ruler horizontally on the sample and mark 10cm/4in across with pins. Count the number of stitches between the pins. To check the row tension, place the ruler vertically on the sample and mark out

10cm/4in with pins. Count the number of rows between the pins. If the number of stitches and rows is greater than specified, try again using larger needles; if less, use smaller needles.

The stitch tension is the most important element to get right.

The following terms may be unfamiliar to US readers:

UK terms	US terms
Aran wool	"fisherman" (unbleached wool) yarn
ball band	yarn wrapper
cast off	bind off
DK wool	knitting worsted yarn
double crochet stitch	single crochet stitch
4-ply wool	sport yarn
make up (garment)	finish (garment)
rib	ribbing
saddle (on a sleeve)	shoulder shaping
stocking stitch	stockinette stitch
tension	gauge
waistcoat	vest
windcheater	parka

In the US balls or hanks of yarn are sold in ounces, not grams; the weights of the relevant Rowan Yarns are given on this page.

In addition, a few specific knitting and crochet terms may be unfamiliar to some readers. The list on this page explains the abbreviations used in this book to help the reader understand how to follow the various stitches and stages.

IMPORTANT

With the exception of Rowan DK Fox Tweed and Chunky, and Magpie Aran, all the yarns featured in this collection of designs are machine-washable on a wool cycle (40°C/104°F).

After washing, pat garments into shape and dry flat away from direct heat.

Rowan Den-M-nit Indigo Cotton DK will shrink and fade when it is washed, just like a pair of jeans. Unlike many 'denim look' yarns this uses real indigo dye which only coats the surface of the yarn, leaving a white core that is gradually exposed through washing and wearing.

When washed for the first time the yarn will shrink by up to one-fifth on length; the width, however, will remain the same. All the necessary adjustments have been made in the instructions for the patterns specially designed for Den-M-nit.

The knitted pieces should be washed separately at a temperature of 60-70°C (140-158°F) before sewing the garment together. The pieces can then be tumble-dried. Dye loss will be greatest during the initial wash; the appearance of the garment will, however, be greatly enhanced with additional washing and wearing.
