INTRODUCTION

There is still a tremendous amount of enthusiasm for knitting, particularly among those who love to see children wearing garments that have been handcrafted rather than mass produced, but who do not have the skill or the time to knit complicated designs. Baby gifts are also more special when they have been made rather than bought and simple garments or accessories are a perfect way for the less confident knitter to produce a lovingly crafted present.

Simple knits do not have to be boring or unexciting – lovely effects can be produced by using a beautiful, good quality yarn in a garter or moss stitch design, a classic style can be enhanced with colourful embroidery; and attractive colourwork can be achieved by using small, easy-to-follow patterns.

Quick Baby Knits is a collection of over 25 designs in which the message is less is more.

BASIC INFORMATION

NOTES

Figures for larger sizes are given in round () brackets. Where only one figure appears, this applies to all sizes. Work figures given in square [] brackets the number of times stated afterwards.

Where 0 appears, no stitches or rows are worked for this size.

The yarn amounts given in the instructions are based on average requirements and should therefore be considered approximate. If you want to use a substitute yarn, choose a yarn of the same type and weight as the one recommended. The following descriptions of the various Rowan or Jaeger yarns are meant as a guide to the yarn weight and type (ie, cotton, mohair, wool, etc.). Remember that the description of the yarn weight is only a rough guide and you should always test a yarn first to see if it will achieve the correct tension.

Magpie Aran: a fisherman medium-weight yarn (100% pure new wool); approximately 150m/164yd per 100g/3½oz hank.

Cotton Glacé: a lightweight cotton yarn (100% cotton); approximately 112m/123yd per 50g/1½oz ball.

Designer DK: a double knitting-weight yarn (100% pure new wool); approximately 115m/125yd per 50g/1½oz ball.

DK Handknit Cotton: a medium-weight cotton yarn (100% cotton); approximately 85m/90yd per 50g/1½oz ball.

DK Tweed: a double knitting-weight yarn (100% pure new wool); approximately 110m/120yd per 50g/1½oz ball.

Super Chunky Tweed: a chunky weight (100% wool); approximately 80m/88yd per 100g/3½oz ball.

Cashmere 4 ply: a 4 ply yarn (90% Cashmere, 10% polyamide); approximately 98m/108yd per 25g/1oz ball.

Pure Cotton: a double knitting-weight cotton yarn (100% cotton); approximately 112m/123yd per 50g/1½oz ball.

The amount of a substitute yarn needed is determined by the number of metres/yards needed rather than by the number of grams/ounces. If you are

unsure when choosing a substitute, ask your yarn shop for advice.

TENSION

Each pattern in this book specifies a tension – the number of stitches and rows per centimetre/inch that should be obtained with the given needles, yarn and stitch pattern. Check your tension carefully before commencing work.

Use the same yarn, needles and stitch pattern as those to be used for the main work and knit a sample at least 12.5cm/5in square. Smooth out the finished sample on a flat surface, but do not stretch it. To check the tension, place a ruler horizontally on the sample and mark 10cm/4in across with pins. Count the number of stitches between the pins. To check the row tension, place a ruler vertically on the sample and mark 10cm/4in with pins. Count the number of rows between the pins. If the number of stitches and rows is greater than specified, try again using larger needles; if less, use smaller needles.

The stitch tension is the most important element to get right.

In the US, balls or hanks of yarn are sold in ounces, not in grams; the weights of the relevant Rowan or Jaeger yarns are given on this page.
