Dream maker

All young children have timeless spirit and the ability to be totally absorbed in an imaginary adventure. However, they do need a comforting playmate toy with which to share their triumphant 'today I sailed to sea and found the buried treasure' or 'tomorrow I'll be a beautiful princess and, and, and ...' fantasy. Because I look back affectionately to my primary-school years – romps through fields and forests, holidays by the seaside – I made this book a homage to all childhood wishes and dreams. It is an evocative makers' book that gives you the chance to create a special imagination tool for your young dreamer, and is a great way of using up leftover yarns. Knit a dream!

Knitting basics

Holding the needles and wool

Knitters hold the needles and yarn in various ways. Try one of these three techniques to see which suits you best. Reverse the instructions if you are left-handed.

English method

While knitting, hold both needles from above between your left thumb, forefinger, and second finger, leaving the right hand to make the stitches. Hold the yarn on your right hand by passing it under and around the little finger, over the ring finger, under the second finger, and over the forefinger. Use your index finger to wind the working yarn over the tip of the needle to make the stitches, while your little finger controls the tension (the tightness/looseness) of the yarn and therefore the neatness of the knitting.

Continental method

Hold the needles as you would with the English method only this time wrap the yarn around your left little finger and over the top of the left forefinger. Use the right-hand needle to make the stitches, while controlling the tension with your left hand.

French method

Wrap the yarn around your fingers as for the English method but hold the right-hand needle from below as you would a pencil. Use your right forefinger to guide the working yarn.

Slip knot

Most knitting starts with a slip knot, which becomes the very first stitch on the needle.

1 Leave a long tail of yarn. Wind the working yarn around your left index finger from front to back and around to the back again. Slide the circle of yarn off the finger and push a loop of working yarn through the circle from back to front. Push the tip of one needle through the loop and pull the slip knot up.

2 Pull the loose tail of yarn down away from the needle to tighten the knot, although not too tightly. Pull the working yarn if you need to slacken the knot.

Casting on

Here are two methods of casting on – have a go at both then see which one you feel most comfortable with.

1st method

1 Holding the yarn at the back of the left-hand needle, insert the tip of the right-hand needle into the slip knot from the front to the back. With the working yarn in your right hand, pass it from the back of the work to the front around the tip of the right-hand needle as shown.

2 With the left-hand needle still in the slip knot, draw the right-hand needle and the working yarn forwards through the slip knot to make a loop on the right-hand needle. Slip the loop onto the left-hand needle as shown by the arrow.

3 Remove the right-hand needle. You have now cast on two stitches.

To cast on more stitches, insert the right-hand needle into the front of the second stitch and then repeat from step 1. Continue to make stitches in the same way until you have the required number on the needle.

Now you can begin to knit or purl rows to create the knitted textile.

2nd method

1 Put the yarn from the short end of the yarn around your thumb and the yarn from the ball of yarn around your forefinger as shown above.

2 Take two needles in your right hand, and insert the tip of the needles under the yarn, between the thumb and forefinger as shown.

3 Insert the needle up through the loop on your thumb (a), around the loop on your index finger (b), and through the centre of the loop on your thumb (c) so that the yarn around the forefinger is drawn through the yarn on your thumb. Let the yarn slip off your thumb and again place the end of the yarn around your thumb.

Continue to make stitches in the same way until you have the required number on the needle.

Now you can begin to knit or purl rows to create the knitted textile.

Knitting basics

Knit (K)

A knitted row is usually the right side of the textile. Knitting every row produces garter stitch.

- 1 With the cast-on stitches on the left-hand needle, insert the tip of the right-hand needle into the first stitch from the front to the back. Holding the working yarn at the back of the needles, bring it around the tip of the right-hand needle, so it is in between the right- and left-hand needles.
- 2 Draw the yarn forwards through the stitch on the left-hand needle to make a new stitch on the right-hand needle. Slip the original stitch off the left-hand needle. Continue knitting in this way into each cast-on stitch, until they have all been knitted onto the right needle.

Purl (P)

Alternating purled and knitted rows is known as stocking stitch. Here are two methods to choose from.

1st Method

- 1 Hold the needle with the stitches in your left hand and the yarn in the right hand. Holding the working yarn at the front of the work, insert the right-hand needle through the first stitch on the left-hand needle from the back to the front. Wind the working yarn over the top of the right-hand needle from the right to the left.

- 2 Draw the yarn through the stitch on the left-hand needle to make a new stitch on the right-hand needle. Slip the original stitch off the left-hand needle. Continue purling in the same way to the end of the row.

2nd Method

- 1 Place the yarn on the left hand and left forefinger. Holding the working yarn at the front of the work, insert the tip of the right-hand needle into the stitch from right to left.
- 2 Twist the left-hand needle up and around the yarn, then pull the yarn through the stitch. Let the original stitch slip off the left needle.

Increase (inc)

To add a stitch to the row, knit (purl) into the front and then the back of a stitch to increase one stitch. This is abbreviated as Kfb (Pfb).

- 1 Work to where the extra stitch is needed. Knit or purl through the front of the stitch but do not drop it off the left-hand needle.
- 2 With the yarn at the back of the work, and slip the tip of the right-hand needle through the back of the stitch still on the left-hand needle, and knit or purl another stitch. Slip the original stitch off the left-hand needle.

Decrease (dec)

This technique makes the width of the textile narrower and is used for shaping.

On a knit row

Insert the tip of the right-hand needle from left to right into the second stitch (see above) and then the first stitch on the left-hand needle, then knit the two stitches together to make one stitch.

On a purl row (not illustrated)

Insert the right-hand needle from right to left through the first two stitches on the left-hand needle, then purl them together to make one stitch.

Casting off

This is the way to finish your piece of knitting so that it does not unravel.

- 1 Knit or purl the first two stitches according to the pattern, so that two stitches are on the right-hand needle.
- 2 Use the tip of the left-hand needle to lift the first stitch (illustrated as a white outline), then pass it over the second stitch and off the needle. Knit or purl the next stitch on the left-hand needle. Repeat from the beginning of this step until one stitch remains.
- 3 Pull the last stitch to tighten it. Break off or cut the working yarn, leaving a long end for sewing the seams later. Thread the end through the last stitch and pull it to tighten it.

Crochet basics

Slip knot

Almost all crochet starts with a slip knot – the very first stitch on the hook.

- 1 Leaving a long tail of yarn, loop the yarn as shown above, crossing the ball end over the tail end. Insert the hook through the loop catching the yarn attached to the ball.
- 2 Pull the yarn through to make a loop. Gently tighten the loop knot and slide it up the hook.

Make chain (ch)

These next steps direct you how to make the first group of chains upon which the crochet will be worked. Each crochet pattern will instruct you how many chain to make to begin.

- 1 Wrap the yarn from the ball around the little finger of your left hand, then allow it lie under the forefinger. This will help you maintain an even tension as you crochet. Hold the hook in your right hand as you would a pencil or as you would a knife – however you feel comfortable. The hook should be facing downwards.
- 2 Keep the yarn taut and use the forefinger of the left hand to place the yarn around the lip of the hook.

Then pull the yarn around the hook through the loop on the hook.

To make the number of chains required in the pattern, repeat step 2. You can count them easily as each one forms a neat chain loop.

Slip Stitch (ss)

Slip stitch or single crochet is used in the projects to join the end and the beginning of a round.

- 1 With the crocheted chain held taut between your thumb and middle finger of your left hand, and the working yarn over your forefinger, insert the hook into the second chain from the hook. Wrap the yarn around the hook and draw a new loop through both loops on the hook (as shown by the arrow). This leaves one loop remaining on the hook. One slip stitch has been made.

Double crochet (dc)

This is the easiest of all the crochet stitches, and the one that is used for the majority of the projects in this book.

- 1 With the crocheted chain held taut between your thumb and middle finger of your left hand, and the yarn over your forefinger, insert the hook into the second chain from the hook. Wrap the yarn around the hook and draw a new loop through the chain. This leaves two loops remaining on the hook.
- 2 Wrap the yarn around the hook and pull a loop through both loops on the

hook. One loop remains on the hook. One double crochet has been made.

Repeat steps 1 and 2 in each chain to the last chain to complete one row of double crochet (1 row dc).

To make more rows of double crochet, turn the work so that the hook is at the opposite edge of the last row. Make one chain stitch then insert the hook into both loops of the first double crochet of the last row, to make the first double crochet. Work a double crochet into each double crochet in this way.

Treble crochet (tr)

Working treble crochet results in a more open texture than double crochet. It was used in the Mustang Blanket project to create an open design.

- 1 With the crocheted chain held taut between your thumb and middle finger of your left hand, and the working yarn over your forefinger, wrap the yarn around the hook and insert the hook into the fourth chain from the hook.

- 2 Pull a loop through this chain only so there are three loops on the hook. Wrap the yarn around the hook again and pull a new loop through the first two loops on the hook. Two loops are now on the hook.

- 3 Wrap the yarn around the hook again (a third time), then pull a new loop through both loops on the hook. One treble has been made. Make more in the same way.

Crochet basics

Working in rounds

To create a circular piece, you can work crochet in rounds rather than rows. The initial chain row is made into a ring and this becomes the foundation on which the circular piece is worked.

- 1 Make a length of chain as directed in the pattern. Then join this into a ring with a slip stitch. Insert the hook into the first chain made, wrap the yarn around the hook and draw a new loop through both loops on the hook. This forms a ring of chain stitches.

- 1 Insert the hook, front to back, through the centre of the ring. Wrap the yarn around the hook (at the back of the ring) in the direction shown.
- 2 Draw a new loop back through the ring. This leaves two loops remaining on the hook.

To work treble crochet (tr) into the ring (see above)

Wrap the yarn around the hook first, insert the wrapped hook into the ring and then draw a new loop back through the ring. Complete the treble in the usual way. Make as many treble into the ring as instructed.

- 3 Wrap the yarn around the hook and pull a loop through both loops on the hook. One loop remains on the hook. One double crochet has been made into the ring. Continue making as many double crochet into the ring as the pattern directs. From here on the crochet is worked in rounds around the edge of the ring into each stitch. It is always a good tip to lay a strand of yarn over the last/first stitch as a marker at the beginning of each round to determine where you started.

To work double crochet (dc) into the ring (see below)

Adding on new yarn

You will need to join in new yarn if your first ball of yarn runs out or if you wish to add a new colour.

Insert the hook into the crochet at the point desired, wrap the new yarn over it, and simply pull a loop through, leaving a tail of about 10cm/4in. Continue with the crochet as required. Weave in any loose ends when the crochet has been completed.

To fasten off

This is the way to finish your crochet at the end of a piece to stop it unravelling.

When you have reached the end of the pattern, cut the yarn about 10cm/4in from the work, pull the tail end through the loop on the hook, and pull tight. Weave in any loose ends on the wrong side of the piece.

Mattress stitch

Also known as invisible seaming, this is widely used for joining side and sleeve seams on knitting, or where a flat seam is required.

- 1 Place the two pieces to be joined side by side, right sides up, matching stitch for stitch. Thread a blunt-ended yarn needle with a length of matching yarn. Bring the needle out through the centre of the first stitch, just above the cast-off edge on one piece. Slip the needle through the centre of the corresponding stitch on the other piece and out through the centre of the stitch above. Then insert the needle through the centre of the first stitch on the first piece again and out through the centre of the stitch above it. Continue in this way along the whole seam.

Backstitch

This method is good for firm seams on both knitting and crochet.

- 1 Place the two pieces to be joined right sides together and pin the edges together, matching stitch for stitch. Thread a blunt-ended yarn needle with a length of matching yarn. Work from right to left. Bring the yarn to the front of the work, one stitch in from both adjacent edges. Insert the needle from the front to the back through the layers and back through to the front, one stitch to the left of the original stitch.
- 2 Insert the needle through the layers two stitches to the right, at the end of the previous stitch and back through to the front again four stitches to the left. Repeat from the beginning of this step until the seam has been completed along the edge.

Sew in each loose end by threading it onto a needle and working running stitch along the edge of the item. Oversew to secure the thread.

Swiss darning

This is a simple way to add a pattern over the top of finished stocking stitch. Work from the chart, reading each square as one Swiss-darned stitch.

Thread a blunt-ended yarn sewing needle with the appropriate coloured yarn and bring it up through the middle of a knitted stitch, leaving a long end at the back. Darn an embroidered stitch over the top of each stocking stitch. Weave in all the loose ends at the back of the knitting when the embroidery is complete.

Running stitch

These neat stitches can be used for sewing seams or as a decorative top stitch.

Secure the thread and sew small even stitches along the line.

Slip stitch

Use this stitch to secure a folded edge in place on your fabric, as on a hem.

Secure the thread in the fold and work from right to left. Slide the needle through the folded edge, then make an almost invisible stitch by picking up a few threads in the fabric you are stitching it to. Continue in this way.

Making a casing

Use this method for creating a casing for elastic or a drawstring, for example around a waist.

Fold the casing allowance to the wrong side and then fold under the raw edge. Sew the casing in place along both folded edges with running stitch. Leave an opening in the bottom line of stitching or, if the casing runs across a seam, carefully unpick the wrong side of the seam between the two rows of stitches. Thread the elastic or drawstring through the casing, using a safety pin. Join the ends securely and let them slide inside the casing. Slip stitch the casing closed.

French knot

Lying like a bead on the fabric, a French knot is decorative and textural.

Bring the needle and thread through to the front. Wind the thread two or three times around the tip of the needle. Keeping the coils taut, re-insert the needle close to where the thread first emerged. Pull the thread through, making sure the knot holds its shape. Secure the thread at the back.

(Legs curl into tubes naturally and do not need seaming.)

To make up

Press front and back of doll lightly on wrong side, following instructions on yarn label. Do NOT press arms and legs. Sew on eyes, nose, and mouth before stitching knitted pieces together.

Eyes

Cut out felt pieces for outer and inner eyes, using templates (see page 110). Using two strands of stranded cotton

and an embroidery sewing needle, sew each inner eye to centre of an outer eye with a French knot. Using two strands of stranded cotton and working short straight stitches, sew inner eyes in place, then sew eyes to face on doll front.

Mouth and nose

Follow instructions for individual dolls for mouth and nose.

Body and head

With right sides together and using a blunt-ended yarn needle and matching yarn, sew back of doll to front with backstitches, leaving an opening at bottom edge for turning right side out. Turn right side out and lightly fill doll with toy filling.

Overcast stitch opening closed.

Arms

Weave in cast-on and cast-off yarn ends on each arm to neaten. Sew cast-on

Basic doll

edge of each arm to body at an underarm marker, with row ends curled in on underside of arm.

Legs

Weave in cast-on and cast-off yarn ends on each leg to neaten. Sew cast-off edge of each leg to body at a leg marker, with row ends curled in towards back.

Hair

For strands of hair, cut lengths of yarn A twice as long as desired finished length of hair, or as described in pattern. Work hair as a hairpiece or attach it in individual tufts or strands (see above). Tufted hair method works well with mohair and hairpiece method with thicker yarns. Work as follows:

Hairpiece: Thread a length of yarn A onto a blunt-ended yarn needle and use this to join strands of hair together. Insert needle through strand of hair

at centre of strand for a centre hair parting. Slide strand of hair along length of A on needle. To complete a hair piece, continue adding strands of hair in this way onto length of yarn on needle. Space the strands out along the foundation strand, don't bunch them together. Hair parting is formed along line where hair strands are threaded onto length of yarn on needle. When hairpiece is ready, sew it to top of doll's head with backstitch along centre hair parting. Catch in a couple of strands at side of head to hold hair in place. Alternatively, sew on hairpiece with foundation strand running along head seam, from ear to ear, then cut hair at front to form a fringe.

Tufts of hair: Use six strands of yarn A (mohair) together for each tuft of hair. Align group of six strands, fold them in

half, thread fold through a blunt-ended yarn needle and slide needle along to opposite end of yarn. Beginning at top of head next to head seam, insert needle in and out, and as needle emerges pass it through loop at folded end of strands. Pull loop down to top of head to secure, then slip off needle. Sew on tufts of hair like this all along what will be hairline – from ear to ear. Work two or more rows across back of head until the desired effect is achieved.

Basic horse

This is the basic pattern for the horses in the book. Refer to this pattern when knitting them.

To make up

Press pieces lightly on wrong side, following instructions on yarn label.

Head and body

Using blunt-ended yarn needle, matching yarn and mattress stitch for seams throughout, sew seam that runs from gathered end of horse along underside of horse and up marker (marking beginning of underside of neck). Then sew cast-off edge of head to shaped side of neck up to marker, leaving remaining head seam open.
Cut out felt pieces for outer and inner eyes and nostrils, using templates (see page 110). Using two strands of stranded cotton and an embroidery sewing needle, sew each inner eye to centre of an outer eye with a French knot. (To further secure inner eye, if desired, work short straight stitches around edge of inner eye).

Using two strands of stranded cotton and an embroidery sewing needle, sew eyes and nostrils to horse with short straight stitches.

Sew remaining head seam, leaving an opening for inserting filling. Insert filling, manipulating it to shape horse as shown. Using long tail end of yarn A at cast-on edge of muzzle, run a gathering stitch around cast-on edge of muzzle, pull tight to gather, and secure with a few stitches.

Legs

Sew seam leg and hoof seam at back of each leg. Then fill hoof with toy filling. If you want a stiffened leg, fold a sheet of A4 paper in half widthways, then roll tightly along diagonal. Insert roll into leg and down into middle of toy filling in hoof. Lightly insert filling around paper roll along leg. Trim paper flush with top of leg. Then run a gathering stitch around top of leg, pull tight and secure with a few stitches, leaving a long length of yarn to sew leg to body. If desired, bend paper/leg at knee to make leg appear flexible.

Prepare all four legs in same way.
To position forelegs on body, start under horse's head at chin seam and measure 11cm/4 1/4 in along seam to under shoulder – place a pin at this point on seam. With front of hoof facing towards nose and each inner leg 2cm/1 in from either side of pin, overcast stitch each foreleg in place around gathered edge, using matching yarn.

To position hind legs, start level with back of forelegs and measure 7cm/2 3/4 in along body seam – place a pin at this point on seam. Overcast stitch each hind leg in place as for forelegs.

Ears

Working a few stitches to secure, sew

together two points of each knitted ear triangle that have a long tail end of yarn – this forms a loop at one side edge of knitted triangle (free point of triangle forms tip of ear).
With the inside of each ear facing outwards and outer edge of ear at position indicated by markers at top of head, overcast stitch 'row-end loop' onto horse, using matching yarn.

Mane

For mane, cut 30cm/12 in lengths of yarn B (mohair). Use six or seven strands of mohair yarn together for each tuft of mane. Align group of six or seven strands, fold them in half, thread fold through a blunt-ended yarn needle, and slide needle along to opposite end of yarn. Beginning between ears, insert needle in and out at centre of head and as needle emerges, pass it through loop at folded

end of strands. Pull loop down to top of head to secure, then slip off needle. Sew on tufts of mane like this all along fashioned detail made by decreases along centre of back of head. Work more tufts in this way at either side this line of tufts, if you wish, to achieve a full head of hair. If you wanted to use thicker yarn, use one strand at a time, double it, thread the loop through the needle, and make tufts in same way (see above).

Tail

For tail, cut 60cm/24 in lengths of yarn B (mohair). Sew on tufts of yarn as for mane, starting at centre of tail at the back end of horse and adding more tufts around first tuft in circles until tail has desired fullness.

Using 2mm (US size 2) needles and yarn E (white), cast on 25 sts.
Cast off.

To make up

Press skirt, bodice pieces, bodice sleeves and apron lightly on wrong side following instructions on yarn label.
Sew bodice side seams, leaving 12mm/½in from neck edge unsewn to form armholes. Sew sleeve seams, leaving 12mm/½in from neck edge unsewn. Ease each gathered edge of sleeve to fit neck edge to give an off-the-shoulder effect and sew free row ends at top of sleeve to armholes. Sew back seam on skirt. Slip stitch top of skirt to wrong side of bodice waistline.
Sew cast-off edge of each apron tie to one side of top of apron.

Gold filigree embroidery

Using yarn G (gold metallic) and a blunt-ended yarn needle, embroider the bodice and apron with curlicues as follows:

- 1 Mark the filigree design on the bodice with pins and then basting stitches. Then using pins, mark four equally spaced points along bottom of the apron about 1cm/½in from cast-on edge. Starting at these points and ending at waist, mark four apron curlicues with basting stitches.
- 2 To start each curlicue, secure a length of yarn to the wrong side of the knitting and bring it through to the right side at the beginning of the line. Remove the needle.

A child's wishes amount to many and can be somewhat impossible. However, these dolls are highly achievable and can be completed within a week – that's one sorted!

Making the Princess

- 3 Thread a new length of yarn onto the needle and secure it to the wrong side of the knitting.
- 4 Lay the first length of yarn along the curlicue line and use the second length to secure it in place with small couching stitches worked about 6mm/1in apart all along the curlicue.
- 5 At the end of each line, take both yarns back to the wrong side and secure. Remove basting.

Embroidered roses

As an optional extra work four embroidered roses along the bottom of the skirt, one at the beginning of each

curlicue, and one rose on the front of the bodice at the shoulder. This technique may seem a little daunting, but once mastered it is as easy as basic knitting – in fact, the technique is similar to casting on. It is a good idea to practice your first rose on a tension square. Using yarns F (dark rose pink) and C (mid rose pink) and a blunt-ended yarn needle, work each cast-on rose as follows:

- 1 Secure a length of yarn F (dark rose pink) to the back at the position for the centre of the rose.
- 2 Bring the needle to the front and

take a tiny backstitch from right to left close to where the needle first emerged, leaving the needle in the fabric.

- 3 Keeping the thread taut, use your left forefinger to cast on loops onto the tip of the needle – just like the simplest knitting cast-on technique. (The loops once made are identical to close buttonhole stitches). Cast on 12 loops in total, sliding each one down the needle close to the fabric.
- 4 Holding the cast-on loops in your left hand, pull the needle and thread (with your right hand) through the loops.

- 5 To anchor the loops, insert the needle through the fabric close to where it last emerged and pull the thread through. Pull firmly but do not let the cast-on loops disappear into the knitting. This completes the first petal.
- 6 Work five more inner petals spiralling around the centre of the rose. Make each of these as for the first petal, but make the backstitch twice as long and cast on 14 loops instead of 12.
- 7 Change to yarn C (mid rose pink) and work six more petals around and overlapping the inner petals, each with 16 loops. This completes the rose.

PRINCESS CROWN

purl-stitch side facing out, and overcast stitch two side edges of sole together, stitching across the cast-on edge (toe end of slipper) and cast-off edge as well. Shape upper over tip of your index finger, then lay it over toe-end of slipper, with sole seam at bottom of slipper. Sew upper in place, using yarn G. Embroider a rose on top of each slipper, working five bullion knots in yarn F (dark rose pink). Make a loop of green yarn on each side of rose for leaves.

Place the motifs on one side of the wings and when you are happy with the placements, stitch the shapes in place with tiny running stitches, using an embroidery sewing needle and matching thread.
- 2 Carefully mark the filigree design on each of the wings with basting stitches.
- 3 To start each line of filigree, use an embroidery sewing needle to secure a length of yarn MC to the wrong side of the wing and bring it through to the right side at the beginning of the line. Remove the needle.
- 4 Thread the embroidery sewing needle with a matching sewing thread and secure the thread to the wrong side of the wing.
- 5 Lay the length of yarn along the basted guideline and use the sewing thread to secure it in place with small couching stitches worked about 6mm/¼in apart all along the filigree line.
- 6 At the end of each line, take the yarn and the thread back to the wrong side and secure.

TROUSERS

To make trousers

The stitching details on the trousers were already on the scrap of denim used. However, the effect is easy to achieve by machine stitching lines on the trouser pattern pieces before they are sewn together.

Using matching thread and an embroidery sewing needle or a sewing machine, make the jeans with chaps as follows:

- 1 Using the pattern-piece templates for the trousers (see page 111), cut out the paper pattern for the trouser tops and chaps.
- 2 Fold the denim in half widthways, with right sides together.
- 3 Pin the pattern piece for the top of the trousers to the double thickness of the denim. Cut out four pieces.

4 With right sides together, pin the two halves of each leg together. Allowing for a 6mm/¼in seam, hand or machine stitch.

5 Turn one trouser leg right side out and place it inside the other leg so that the right sides are together. Align the crotch seams and sew the seam to join the front and back. Turn right side out.

6 Turn under 5mm/¼in twice at the waist to form the waistband casing and stitch in place close to the first fold, leaving an opening to insert the elastic.

7 Thread one end of the elastic through the large-eyed, blunt-ended yarn needle, then insert the needle into the waistband casing at the opening and feed the elastic through waistband (be careful not to lose the end of the elastic inside the waistband). Pull up the elastic to fit around the Cowboy's waist and trim off the ends. Machine or hand stitch the ends of the elastic together very firmly, then tuck the joined ends inside the waistband to conceal them. Stitch the opening closed.

8 Hem, then press the trousers.

9 Pin the pattern pieces for chaps to the mid brown felt and cut out.

10 Fit each chap around the denim legs at the hem and hand stitch in place. Sew on two pairs of thin felt strips to outer of each chap, pinching together the sides of the chaps at the same time.

HAT

To make hat

Using matching thread and an embroidery sewing needle, make the

hat as follows:

- 1 Using the templates for the hat (see page 111), cut the brim pieces from cream felt and the crown pieces from ecru felt.
- 2 Overcast stitch the crown pieces together along the sides and top, leaving the base edge open. Turn right side out.
- 3 Sew the short edges of the brim together. Turn right side out.
- 4 Ease the base edge of the crown to fit inside the hole of the brim, then overcast stitch the brim to the crown inside the hat.

GUN AND HOLSTER

To make gun and holster

Using matching thread and an embroidery sewing needle, make the gun and holster as follows:

- 1 Using the templates for the gun and holster (see page 111), cut the holster shape from mid brown felt and the gun shapes from black and cream felt.
- 2 Using running stitch, sew the cream handles to the right side of both gun shapes.
- 3 With right sides together and using running stitch, sew the black gun shapes together all around the edge.
- 4 Fold the holster piece in half with wrong sides together and use running stitch to sew the angled sides together.
- 5 Make a twisted cord from one strand of yarn A (dark brown) and two strands of yarn B (grey) for the belt. Knot the ends, then sew to the holster. Slip the gun into the holster then tie around the cowboy's waist.

- 2 Insert the needle through to the back about 1cm/1in from where it first emerged (B) and bring it through to the front again at the same place where it first emerged (A).
- 3 Evenly wind the thread ten times around the needle, ensuring that the wraps sit close together.
- 4 Ease the wrapped coil down the needle towards the surface of the fabric with your forefinger and thumb. Then holding the coil firmly, pull the working thread taut and gently pull the needle and working thread through the coil.
- 5 Pull the thread away from you to ensure a tight, even knot. To secure the coil, insert the needle through to the back of the knitting at the end of the knot (B) and secure.

Captured for a brief moment from a tropical ocean blue, a beautiful mermaid has many tales to tell of that magical world from whence she came.

Making the Mermaid

- 6 Tease the coil to make it even.
- 7 Work another knot in the same way next to the first.
- 8 To create the shell curve, work two more knots at either side of the first two and at slight angles.
- 9 To complete the shell, work three satin stitches at the base of the knots (A) to form the base of the shell.

Starfish decoration

Using an embroidery sewing needle and six strands of pale coral stranded cotton (or a single strand of 4-ply yarn), work a starfish on front of tail in position shown. Work starfish as for shell, but instead of bunching knots together, work five knots radiating out around centre point (A).

To make up

Press front and back of doll, tail, and fins lightly on wrong side following instructions on yarn label. Do NOT press arms.

Sew on eyes, nose, and mouth before stitching knitted pieces together.

Eyes

Make up eyes as for Basic Doll, using two strands of black stranded cotton for French knots and for sewing inner and outer eyes in place.

Sew together pieces for body and head, and sew on arms as for Basic Doll.

Hair

Using yarn A (mottled tangerine), make a hairpiece with a centre parting and sew to doll as for Basic Doll.

Work a decorative shell in hair as for shell on tail, but using six strands of light blue stranded cotton (or a single strand of 4-ply yarn). Work a second shell along hair strands using red

Scalloped edgings

Arrange scalloped edgings along tail piece so that they are evenly spaced, positioning shortest (first scalloped edging) near tip of tail and positioning three longer edgings to match tail

shape. Pin in place with row-end edges of edgings aligned with row-end edges of tail. Using a blunt-ended yarn needle and matching yarn, sew edgings in place.

Tail

With RS facing, sew back seam of tail, catching ends of scalloped edgings into seam. Turn right side out.

Waist ruffle

Sew waist ruffle to top edge of tail.

Tail fins

Using a blunt-ended yarn needle and matching yarn, sew tail-fin pieces together in pairs to make two fins, leaving a small opening for inserting filling. Fill lightly with toy filling and sew opening closed. Sew tail fins to tip of tail. Fill tail with toy filling, then sew it to Mermaid's body.

Belly button

Using a blunt-ended yarn needle and yarn MC (light pink), work a French knot on doll for belly button.

Fish, seahorses, and crab

Children love mermaids' friends. They are very quick and easy to knit, so make lots of them in a whole variety of colours. I used tapestry yarn for these because of the huge colour range available.

Finished sizes

Fish: Completed toy measures approximately 11.5cm/4½in from tip of nose to tip of tail.

Sea horse: Completed toy measures approximately 15cm/6in from tip of nose to tip of tail.

Crab: Body of completed Crab measures approximately 4.5cm/1½in in diameter.

Yarn

Use skeins of Anchor wool tapestry yarn in quantities specified below for each fish, and small amounts of DK-weight yarn for seahorses and crab, or use other DK-weight (US light-worsted-weight) yarn in colours of choice.

Orange spotted fish: Two skeins of orange and one skein each of light brown, lilac, turquoise, white, and black.

Turquoise and yellow fish: Two skeins of turquoise and one skein each of black, pale yellow, and white.

Yellow, black, and white fish: Two skeins of yellow and one skein each of white and black.

Black and white fish: Two skeins of black and one skein each of white, hot pink, pale yellow, and orange.

Blue sea horse: Turquoise, mid blue, green, hot pink, white, and black.

Pink sea horse: Hot pink, rust, light coral, white, and black.

Crab: Yellow, pale ochre, white, orange, and black.

Extras

Crab legs: Scrap of light coral 4-ply cotton yarn for crab legs.

Filling: Polyester toy filling.

Refold fish in half lengthways, but with wrong sides together. Backstitch seam along backbone and tail, working 6mm/1/4in from edge along top of fish (to form a fin top). Insert filling and complete seam by sewing cast-on edge above tail to WS of tail. Form end of nose into an O-shape and sew in place.

Top fringe

Cut 11 strands of lilac yarn, each 13cm/5in long. Fold one strand in half, thread fold through a blunt-ended yarn needle and slide needle along to opposite end of yarn. Templates

Use the patterns and templates on these three pages to make the sewn garments and accessories, following the instructions given here and in each project.

Where possible, the patterns and templates are printed at the correct size, but some will need to be enlarged on a photocopier, for which the appropriate enlargement factor is given.

Note that some of the templates combine layers of different shapes, each one in a different colour. Also, where necessary there is a guide line to show where each of the pieces are to be placed.

Transferring patterns

Photocopy the pattern piece or template, enlarging it if necessary to the size specified. Take a note of how many pieces of fabric you need to cut for each pattern piece. Pin the pattern pieces to the chosen fabric, taking care to align the grainline arrow with the straight grain of the fabric and, if necessary, place any fold lines on a fold in the fabric. Cut out each shape along the outer line. Transfer any dots, notches, or other markings to the fabric.

Eyes, nose, and mouths

All the templates below are life size (100 per cent). For each doll, cut two of each inner and outer eye and one mouth. The large eye and nostril at the top left (fig 1) are for the horses. The eye and mouth at the top right (fig 2) are for the girl dolls – the Princess, Fairy, and Mermaid. The small eye and mouth (fig 3) are for the Baby Fairy. The eye at the bottom right (fig 4) is for the Cowboy and Pirate, as are the outlines for the nose and mouth.
