1 pair 4.00mm knitting needles or size needles to give the correct tension. Oddments of 2 contrast colours for embroidery.

Tension

For best results always read the complete instructions and check the tension before starting work. If the tension piece measures less than the required width try a size larger needle. If the tension piece measures more than the required width try a size smaller needle. Where tensions are given over st st for a patterned garment, check your tension in st st. If you have to use a different needle size to obtain this tension a similar adjustment must be made to the needle sizes used in the patterns. A proper fit and correct size of finished garment is only possible with the correct tension.

Notes

Figures in round brackets refer to the larger sizes. Figures or instructions in square brackets, [], should be repeated as stated after the brackets.

The quantities of yarn stated in this publication are based on average requirements and are therefore approximate.
