Introduction

Knitted toys are colourful, cuddly and fun to make. They appeal to all ages, providing lovable, safe playthings for youngsters and attractive mascots for older children and adults. Most of the toys in this book can be made for next to nothing and the smallest of them requires only oddments of yarn.

There are full instructions for making well over 50 items, ranging from tiny toys which can be knitted in an instant to a 47 cm [18½ in] pair of dolls with sets of removable clothes. Most of the toys are worked in double knitting yarn which is widely available in a wonderful selection of colours. Only basic knitting skills are required because the knitted stitches and shapings are of the simplest kind, allowing even the inexperienced knitter to create attractive toys.

General instructions and useful tips

Safety first

Knitted toys are quite safe and suitable for young children so long as you do not add any potentially dangerous items such as wire, buttons or beads, which could become detached. On the other hand it would be perfectly safe to give an older child a toy which has beads or buttons sewn on for the eyes, so a little common sense should be used regarding the safety factor in toys. If in doubt it is always best to use felt for the eyes and noses or to embroider them with yarn.

Measurements

Any measurements in the instructions are given in metric, followed by the imperial equivalent in square brackets. Use whichever you wish.

USA knitting needles

Needle sizes are given in metric with the old UK sizes in square brackets. Use the following table to convert to the equivalent USA needle sizes.

Opposite: Two playful penguins, on the left the chef (page 54), on the right the penguin with snowballs (page 57)

The table only includes those needle sizes which are required to make the toys in this book.

Metric size	'Old' UK size	USA size
2½ mm	12	1
3 mm	11	2
3½ mm	10	3
3¾ mm	9	4
4 mm	8	5
5 mm	6	7
5½ mm	5	8

Yarns

You will need only oddments of double knitting yarn to make the majority of the toy designs. Four ply yarn is required for making the knitted nursery rhyme scenes. You can use any make of yarn, no specific brands are mentioned.

For some of the larger toys the amount of yarn required is quoted, to ensure that you have enough on hand to finish that part of the toy.

When particular colours are mentioned, this is either for authenticity [for example red yarn for Santa Claus] or to make sure that colours are changed when knitting different parts of the toy. You can of course work with whatever colours you have on hand.

When working in stripes of different colours it is not necessary to keep breaking and joining on the yarns. Simply carry each colour loosely up the side of the work, when it is required for the next stripe.

British and American knitting yarns

Only two types of British yarn are used for the toy designs in this book – double knitting and 4 ply. For knitters in the USA I have tested Brunswick Windrush [knitting worsted weight] and also Brunswick Fore-'n-Aft [sport weight] to check that they can be substituted for the British yarns.

Although the knitting worsted weight felt a little thicker than double knitting, both yarns knitted up in much the same way as the British equivalents, making little or no difference to the appearance of the finished toys.

Knitters in the USA should therefore use knitting worsted weight instead of double knitting and sport weight instead of 4 ply.

Tension

When knitting a garment which has to be made to fit a particular size, you must always take care that your tension is exactly the same as recommended in the knitting instructions.

However you don't need to be so precise when knitting toys. Your creation will be just as lovable even if it does turn out a bit larger or smaller than the size stated on the pattern.

The following tension chart is therefore intended as a *general* guide only, not to be followed slavishly, but to indicate that if you work near to these tensions then your toy will be more or less the same size as given in the pattern. If your tension varies, don't worry! Just make sure that your knitting is not so loose as to allow the stuffing to escape be-

tween the stitches. Should this happen, then use a smaller size knitting needle.

Working with 4 ply yarn:

3 mm [No 11] needles – 30 sts to 10 cm [4 in]

Working with double knitting yarn

3½ mm [No 10] needles – 25 sts to 10 cm [4 in]

3 mm [No 11] needles – 26 sts to 10 cm [4 in]

Working with double knitting yarn, used double:

5½ mm [No 5] needles – 16 sts to 10 cm [4 in]

5 mm [No 6] needles – 17 sts to 10 cm [4 in]

The making up instructions

In knitting patterns the directions for assembling the pieces normally come at the end, when all the knitting is completed. However, when making toys there can be so many bits and pieces that it is sometimes easier and less confusing to do the making up as the work progresses. Consequently, for some of the designs, the making up instructions follow after each piece is knitted.

A list of useful equipment

Knitters' sewing needles

These are usually available in two sizes for use with fine and heavy weight yarns. They have large eyes and smooth rounded points designed to pass between the knitted stitches when sewing up your work.

Other needles

You will find darning needles and ordinary sewing needles useful. The darning needle for passing yarn through a toy to work the mouth stitches and features, and the sewing needles for use with ordinary sewing threads.

Pins

Large glass-headed pins are the best kind to use when making knitted toys since they are so easy to see and to handle. For safety's sake, use a limited number of pins and count them from time to time to make sure that you haven't left any in the toy when sewing it up.

Sewing threads

If you don't have a stock of sewing threads in a variety of colours you can buy economical packs of tiny reels which are ideal for hand-sewing, each reel holding about 10 m [10 yd] of thread.

Tweezers

A pair of tweezers with pointed ends are extremely useful for turning small pieces right side out and for pushing small amounts of stuffing inside. Use them also to hold felt eyes and noses while spreading with adhesive and to position any such pieces on the toy.

Leather punch

This is not essential but if you have one then use it to punch out tiny felt circles for the eyes of the smallest toys.

Ruler or tape measure

Either metric or imperial will do.

Casting on and off

The first row after casting on is usually the right side of the work unless otherwise stated.

When casting on and off and also when joining on different colours, always leave a long end of yarn which can be used when making up the toy, to sew up each different coloured portion.

If the instructions say to cast on or cast off 'loosely', use a larger size of knitting needle to do this evenly.

The knitted stitches

Only two types of knitted stitch are used for the toys in this book; stocking stitch, where you knit one row and purl the next, and garter stitch, where you knit on every row.

Joining on new balls of yarn

Instead of knotting on the yarn at the beginning of a row, join on a fresh ball in the following way. Thread a darning needle with the new yarn then take the needle point through the yarn loop of the first stitch on the previous row and also through the yarn strand coming away from the first stitch on the needle, as

shown in the diagram. Pull the yarn through, leaving a long end. You must take care to pierce both the yarn loop and the yarn strand, then the first knitted stitch on your next row will hold firm and not slip open as you work.

The knitted shapes

When making knitted toys it is important to remember that the knitted pieces will stretch to shape when stuffed, so don't be put off by the unattractive appearance of the pieces at the knitting stage.

Making up the toy

Do not press any part of the work unless the instructions say so. Unless other instructions are given, join the seams with the wrong side of the work outside. Usually the main knitted pieces of the toy should be seamed by back-stitching or stab-stitching the row ends together, working one full stitch within each knitted edge. Always use matching yarn when sewing these seams.

To sew up those toys which are knitted with two strands of double knitting yarn together, use a single strand of yarn.

When adding any extra pieces to a knitted toy, such as felt pieces, knitted arms and hats, sew them in place with matching sewing thread instead of knitting yarn. This gives a really neat finish to the work. Alternatively you can split the yarn into single strands and use this instead.

Some knitted pieces need to be seamed by

oversewing the edges together instead of back-stitching and this is always mentioned in the instructions.

Stuffing the toy

Many types of stuffing are available for toy-making but man-made fibre fillings are the most suitable for knitted toys because they are washable. These fillings come in several grades ranging from the dearest high bulk white polyester to a dense multi-coloured and less expensive filling. The high bulk polyester is ideal for knitted toys since it goes further than the cheaper fillings and also makes beautifully soft resilient toys. Avoid kapok, which can not be washed, and foam chips which are lumpy and also highly inflammable.

Very small amounts of stuffing are required for making most of the toys, so the actual quantity is only quoted in the patterns for the larger toys.

When stuffing your toy, let the knitted fabric stretch naturally to shape and fill all parts evenly. Do not force more stuffing in than necessary. After filling, the toy should still be soft and yielding to the touch, yet firm enough to spring back to shape again.

Ladder stitch

This stitch is used to close the opening left on the toy after it has been stuffed. The edges of the opening are 'laced' together following the same line of vertical knitted stitches as in the back-stitched seam.

Using yarn to match the knitted fabric, secure it at one end of the opening. Now take a

small straight stitch on one side of the opening then on the other. Continue working stitches alternately on each side then pull the yarn tight to bring the open edges together as shown in the diagram. For clarity the diagram is simplified to show only the ladder stitches.

You can also use this stitch to attach the arms or legs of a toy to the body, forming an invisible join.

To shape the neck of a toy with a strand of yarn

When this is mentioned in the instructions use matching yarn and do it in the following way. Take the ends of the strand from the back to the front of the toy, cross them over and take to back again. Cross them over again and pull very tightly, then knot securely. Now use a darning needle to pass the ends of the yarn through the body at the position of the knot. Pull the darning needle through and snip off ends of yarn close to the body so that they disappear into the stuffing.

This method makes a really firm neck, compressing the stuffing tightly at this point and at the same time rounding off the head and shoulders. Shape the wrists in the same way if the instructions say so.

Felt pieces

Patterns for facial features and other felt pieces are printed full size for tracing directly off the pages. Trace them onto thin writing paper then cut out the patterns. You will only need very small scraps of felt in various colours.

Adhesive

Use an all-purpose clear adhesive such as UHU to stick the felt pieces to the toy. Before cutting out the felt pieces first spread the back of the felt with adhesive, work it into the felt with the fingertips, then leave to dry. When felt is treated in this way your cut out shapes will have smooth well-defined edges. The cut

Opposite from left to right: Cinderella (page 67), snowman (page 65), footballer (page 65), Santa Claus (page 66) and Robin Hood (page 63)

edges of ribbons, trimmings and braid can also be spread with a little adhesive, to prevent fraying. You can remove unwanted smears of UHU with a little acetone. Take care when using acetone as it is highly flammable.

To cut out tiny felt pieces, stick your paper pattern to the glued side of the felt with a dab of adhesive then cut out level with the edge of the paper pattern. Peel off the pattern before the adhesive dries completely.

Making a face

For a child-like appearance the eyes should always be placed half way down the face, if you position them higher your toy will have a more adult look. Indications for the placing of facial features may be given in the making up instructions, do follow these if you wish your toy to look like the one shown in the illustration.

To make sure that the eyes are level on a knitted toy, simply check that they are both in line with the same row of knitted stitches.

To work embroidered features

When the head of a toy is to be covered by the hair or a hat then the strand of yarn used for embroidering, for instance, the mouth can be started and finished off at the top or back of the head where it will be hidden. If the stitches can not be covered then proceed as follows. Thread a needle and knot the end of the yarn. Take the needle through the toy from the back of the head or body, passing it *between* the knitted stitches and bringing it out at the position required. Pull the yarn to draw the knotted end right inside the toy and tug, to make sure that the knot is caught in the stuffing. If the knot pulls right through the toy, try again at another position.

Now work the embroidered stitches as required, then pass the needle back through the toy to come out again at a position *between* the knitted stitches. Pass the needle back again *between* the *same* knitted stitches to come out at a different position. Repeat if necessary until the yarn is securely fastened off then snip off end of yarn. Take care to always pass the needle *between* the knitted stitches. If you

split a stitch then the yarn strand will show on the surface of the toy.

To colour the cheeks

Dolls only seem to come to life after their cheeks are coloured and you should use a red drawing pencil for this. First, try rubbing the knitted stitches with the *side* of the pencil lead using a circular motion. This works very well on most yarns. If it doesn't work then moisten the pencil lead and apply a little colour to the centre of the cheek. Now use a bit of wet fabric to blend the colour into the surrounding knitted stitches.

The colour will come off if the toy is washed but it can, of course, be applied again.

To make a twisted yarn cord

Twisted cords are useful for decoration and making little bows where a knitted piece would be too bulky.

To make a cord from a single strand of yarn proceed as follows. First cut a length of yarn, three times as long as the measurement you will require. Knot one end round a door knob and make a loop in the other end to fit loosely over the index finger of your right hand. Now keeping the yarn taut, twist your finger round and round in a clockwise direction, steadying the yarn by holding your left hand cupped around it close to your right hand. Keep twisting until when relaxed, the strand of yarn begins to curl back tightly on itself. Now fold the strand in half, keeping it taut and bringing the ends together. Stroke along the length to make it curl up evenly. Knot both ends of the cord, trimming it to the required length.

To make a cord using two or more strands, use the same method, starting off with the specified number of strands.

To make a pom-pom

The usual way to make a pom-pom is to wind yarn round two card circles with holes cut in the centres. Here is another method which will not make such a dense pom-pom as with the card circles but is quicker and less fiddly.

For a small pom-pom, about 2 cm [$\frac{3}{4}$ in] in diameter, wind yarn about 30 times round two

fingers. Pull the loops off your fingers and cut through twice so that you have 60 approximately equal lengths of yarn. Now knot a strand of matching yarn very tightly round the centre of the strands. Grip the long strands of yarn close to the knot then use sharp scissors to clip the strands to even lengths all over. Use the long strands to sew the pom-pom in place.

To make larger pom-poms wind yarn more times round three or four fingers.

Their one-piece undergarments, socks and shoes are all knitted in as part of the basic doll with added ribbed bands at the neck, upper arms and legs. The underwear also serves as a short sleeved sweater underneath the pinafore dress and dungarees. In addition there is a jump suit and flower-trimmed dress for the girl and track suit, pants and jerkin for the boy.

You will need: A pair of 3 mm [No 11] knitting needles and double knitting yarn which is listed under separate headings for the dolls and their clothes, for quick reference.

To work facial features [girl and boy alike]

Work a short stitch in orange yarn for nose 5.5 cm [$2\frac{1}{4}$ in] up from the neck. Cut the eyes from brown felt using the pattern and stick them to face 3.5 cm [$1\frac{3}{8}$ in] apart on either side of the nose as shown in the illustration.

Work a shallow W-shape 2 cm [$\frac{3}{4}$ in] below nose for the mouth.

Colour the cheeks with red pencil.

Twin dressing-up dolls

For the boy, fold the ears having right side outside and oversew the row ends together. Sew the folded edges to each side of the head having lower edges of ears level with the mouth.

To make the girl's hair

First of all make the fringe by sewing loops of yarn to the top of the head seam, to hang down the forehead just above the eyes. Snip ends of loops evenly above the eyes.

Cut remainder of the yarn into 50 cm [20 in] lengths. Back stitch centre of the lengths to the position of the centre parting on doll's head from forehead to just above neck at back. Gather strands to each side of head and sew to

the head seam level with the mouth. Plait the strands and trim ends evenly, tying round a strand of yarn to hold in place.

To make the boy's hair

Wind yarn 30 times round a 24 cm [9½ in] length of card. Slip wound lengths off the card and place this hank over the top of doll's head as shown in the diagram. Pin, then sew looped ends across forehead just above the eyes. In the same way, sew the other looped ends across back of head above neck. Sew the strands of yarn to the head at seam line at top of head also.

To cover the head at each side of face in front of each ear, wind yarn 10 times round a

10 cm [4 in] length of card. Sew looped ends to head to fill in the gaps as shown in diagram.

To cover the head at back behind each ear, wind yarn 20 times round a 12 cm [4½ in] length of card. Sew looped ends to head to fill in gaps as shown in diagram.

The clothes

To make the girl's pinafore dress

Skirt

Begin at hem edge of skirt and cast on 96 sts then g-st 4 rows.

St-st 28 rows.

Dec for waist: *Next row:* (K 1, K 2 tog) to end – 64 sts.

G-st 4 rows then cast off.

Bib

Cast on 18 sts.

1st row: K.

2nd row: K 3, P 12, K 3.

Repeat these 2 rows 7 more times.

G-st 5 rows then cast off.

Straps [make two alike]

Cast on 36 sts and g-st 4 rows then cast off.

To make up pinafore dress

Thread three rows of elastic through back of g-st rows at waist edge. Sew the cast on edge of bib just inside waist edge of skirt at centre. Join row ends of skirt.

Sew one end of each strap to back of skirt waist edge having ends of straps about 5 cm [2 in] apart. Sew snap fasteners to other ends of straps and also to inside of bib at top corners. Sew buttons to these corners on outside of bib.

To make the scarf [same for girl or boy]

Cast on 12 sts and work in g-st for 46 cm [18 in]. Cast off.

Add fringe to each end of scarf.

To make hair ribbons

For each one cast on 50 sts then cast off.

To make the jacket [same for girl or boy]

Back

Cast on 42 sts and g-st 4 rows.

Five humpty-dumpty toys

Five roly-poly characters to knit up quickly using two strands of double knitting yarn. You can make Jack and Jill, Grandma and Grandpa and Hyacinth, the cuddliest fat fairy. Each one measures about 28 cm [11 in] from top to toe.

You will need: Oddments of double knitting yarn in assorted colours as shown in the illustrations; a pair of 5½ mm [No 5] knitting needles and a pair of 3¾ mm [No 9] knitting needles; small amount of stuffing for each toy; scraps of felt for facial features; short lengths of narrow tape, braids, trimmings etc.

Abbreviations: See page 17.

Notes: Instructions are given for the basic shape of the toy followed by individual instructions with variations for each character. For a tweedy effect, use two different colours or shades of the yarn together.

Important note: Please remember that the double knitting yarn is to be used *double* throughout and worked on 5½ mm [No 5] knitting needles. This is taken for granted in the instructions for each piece and so will not be mentioned again.

When single yarn and 3¾ mm [No 9] needles are required [for the looped fringes and Grandpa's eyebrows only] this will *always* be mentioned in the instructions.

To make up

Main piece

At the cast on edge of the main piece, mark

position of the exact centre of the row with a coloured thread. Join row ends of the main piece [this seam will be at centre back of the doll] then turn right side out.

Now catch the marked centre front point of cast on edge to the centre back seam. Continue sewing back and forth through the doll at the centre position for 7 cm [$2\frac{3}{4}$ in] up the body, to form the legs.

Stuff the body and head through the opening at top of head, then stuff the legs through the lower edges. Pull up length of yarn tightly at top of head and fasten off.

To shape the neck, tie a length of matching yarn tightly round at lower edge of head then sew ends of yarn into body.

Face

Work two stitches in red for the mouth forming a V-shape, 2.5 cm [1 in] up from the neck. Cut the eyes from black felt and the nose from red felt using the patterns then glue them in place. Colour the cheeks with red pencil.

Arms

Join the row ends of each arm leaving the cast on edges open. Turn right side out and stuff. Oversew the top edges of each arm together, then sew tops of arms to each side of the body 1.5 cm [$\frac{1}{2}$ in] down from the neck.

Shoes

Bring the cast on and cast off edges of each shoe together and join the edges, rounding off the corners and leaving a gap for turning. Turn right side out and stuff firmly then ladder stitch the gap. Place a shoe under the open end of each leg, having shoes at right angles to legs. Slip stitch ankle edges of legs to the shoes.

Hair

Using a suitable colour for the hair wind yarn round and round a 2 cm by 20 cm [$\frac{3}{4}$ in by 8 in] strip of thick paper to cover it. Machine stitch through the loops close to one long edge, then tear the paper away. If you do not have a sewing machine then back stitch the loops together along one edge of the paper. Sew this looped fringe round the doll's head.

Cap

Fold cap in half, bringing the row ends together. Sew across the cast off edge and round off the corner before joining the row ends. Turn cap right side out and sew lower edge to head, lapping it over top edge of hair.

Sew a small feather to one side of the cap if desired.

Cut the buckle from felt using the pattern then

stick it in place. Sew ric-rac braid round the neck-line, the wrist edges and the lower edge of the light green on the body, as shown in the illustration.

Next row: K.

Next row: (K 1, K 2 tog) to last st, K 1 – 49 sts. Cast off.

To make up the doll

Join the body pieces at cast on edges oversewing them neatly together. Now join row ends of both bodies and heads, leaving tops of heads open. Turn right side out and stuff, then draw up sts at top of each head and fasten off. Tie a strand of pink yarn tightly round each neck to shape it, then sew ends of yarn into necks.

For nose use deep pink yarn and work a small straight stitch across centre of each face 4 cm [$1\frac{1}{2}$ in] up from neck. For the mouth on the sleeping face, work a straight stitch in pink a bit longer than the nose, 2 cm [$\frac{3}{4}$ in] below nose, then work a small vertical stitch st centre of mouth. For mouth on the wide-awake face, work a V-shape below nose.

Cut wide-awake eyes from felt using the pattern then sew them to the face on either side of nose, placing them about 2 cm [$\frac{3}{4}$ in] apart. For the sleeping eyes, work small shallow V-shapes in black yarn about 2 cm [$\frac{3}{4}$ in] apart on either side of nose. Colour cheeks with red pencil.

The hair [the same for each head]

Wind the ball of 4 ply into a hank measuring about 36 cm [$14\frac{1}{2}$ in] across. Cut through the hank at each looped end, to form two groups of 36 cm [$14\frac{1}{2}$ in] lengths of yarn. For a fringe, sew a few loops of yarn to each forehead about 5 cm [2 in] above the nose. Cut a 14 cm [$5\frac{1}{2}$ in]

length of tape for each head and machine stitch or back stitch centres of yarn lengths to each tape leaving 1 cm [$\frac{3}{8}$ in] of tape uncovered at each end. Turn under these ends of the tape and pin one end to each forehead above fringe and other end to head at back above neck. Sew to heads through stitching lines on tapes. Gather strands of yarn to sides of each head and sew there in bunches. Trim ends of yarn to even lengths.

The arms

Join row ends of each arm. Turn right side out and stuff, filling tops of arms quite lightly. Oversew top edges of each arm together having arm seam at centre back. Sew top edges to sides of body 1 cm [$\frac{3}{8}$ in] down from neck.

The skirts

On each skirt work the flowers as shown in the illustrations round the lower edge as follows. Use purple or red yarn to work four lazy daisy stitches for each flower, spacing the flowers about 4 cm [$1\frac{1}{2}$ in] apart, measuring between centres of flowers. Work two stitches in white at centre of each one.

Now join skirts to each other at cast on edges, oversewing edges neatly together. Join row ends of both skirts. Turn skirts right side out and bring the cast off waist edges together. Put the skirts on the doll having the seams at centre back of the doll. Pin, then sew the waist edge of one skirt just above the centre body seam. Attach second skirt in same way.

Place one collar round one neck and oversew ends together at centre back of doll. Sew cast off edge of collar to back of neck then to front of body as illustrated, to form a square neckline. Sew cast on edge of collar to front and back of body but leave collar free where it passes over each arm. Repeat with the other collar.

For each belt, make a twisted cord from a 2.5 m [$2\frac{3}{4}$ yd] length of purple or red yarn. Knot ends of cord and trim close to knots. Tie a belt round each waist making a bow at centre back. Make a short twisted cord from a single strand of purple or red yarn, tie in a bow and sew to neck edge of dress or nightdress at front.

Crochet a 50 cm [20 in] long loose chain using silver yarn. Attach one end of the chain to the ball.

The rattle

Only the tray portion of the matchbox is required to make the rattle. Cut the tray in half along the length then cut these pieces in half across the width. Use two of these four pieces to form a box, enclosing materials for the rattle as suggested.

Note that for the ghost, a couple of small bells make a sound nearest to that of rattling chains. Secure and seal the edges of the box with sticky tape.

To make up the ghost

Join the row ends of the body then turn right side out. Stuff the head, then the body. If you wish to include a rattle, place it at the centre of the body and pack the stuffing around it.

Now sew the point marked with coloured thread on the cast on row, to the centre back at the seam.
