A New Look at Old Lace

The mere mention of old crochet lace brings to mind memories of delicate, fragile and beautifully detailed pieces worked in the tiniest of threads and elaborate stitch

patterns. Needlecrafters (especially crocheters) search for antique lace in old attics and trunks, at estate sales, flea markets, garage sales, bazaars and craft malls. Old crocheted lace is a real treasure to find not only because of its beauty but also for its many possibilities as an embellishment for our craft projects. It can be added to pillows, quilts, towels, linens, clothing and just about anything that needs a touch of the delicate and elaborate.

Caring for crocheted lace is practically an art in itself. Whether it's antique lace or lace you've crocheted yourself, careful handling and special cleaning methods can prolong the life of these pieces. Old lace can provide heirloom embellishments for several generations. "Handle with care" is a good slogan to remember

when working with old lace.

Age deteriorates the fibers of the threads that may cause the lace to literally fall apart. If lace is badly deteriorated from age or abuse, do not try to clean or wash. This lace should be handled as little as possible and can be used to enhance projects such as framed pieces or wall hangings where its fragile threads will not be disturbed.

Age can cause discoloration, which usually adds character to old lace. But if the lace is badly soiled and must be laundered, place it in a basin of cool

water with mild detergent and let it soak. Never scrub, stretch, or wring lace pieces. To rinse, place it in clear water, changing the water as many times as necessary to thoroughly rinse. Carefully shape the lace on a flat surface to dry.

Torn or damaged lace may need repair or reinforcement stitching before it can be washed or handled. You will want to match the original thread as closely as possible so the repaired areas will not be obvious. Find a loose, frayed or broken end, tie on new thread and work new stitches in to

replace the old. In

other areas, you may only need to stitch some loose ends together using a tapestry needle. Repair stitching should be done inconspicuously, working in the same tension and following the

structure of the existing stitches.

Sometimes a little preventative maintenance can add years of life to old crochet lace. You may only need a little fabric glue on the back side to prevent loose ends from unraveling. For weak areas, use a needle and run some reinforcement stitching through the back of the stitches before they begin to break down. Keep all maintenance and repair work inconspicuous.

If you are unsure about repairing or restoring a particular piece of lace, ask at your local yarn shop if they know of someone who can help. It is good to have hands-on help and advise from someone with experience whom can examine the lace.

STIFFENING & BLOCKING

For blocking thread crochet pieces with water, dampen finished piece and arrange and shape on a padded surface.

Pin in place with rustproof stainless steel pins; allow to dry completely, then remove pins.

If crochet pieces need more stiffening and shaping, fabric stiffener or starching solution may be used. Flat pieces such as the table toppers in this set may be blocked on a flat piece of cardboard covered with plastic wrap.
