General notes

Please read these instructions before working the pattern.

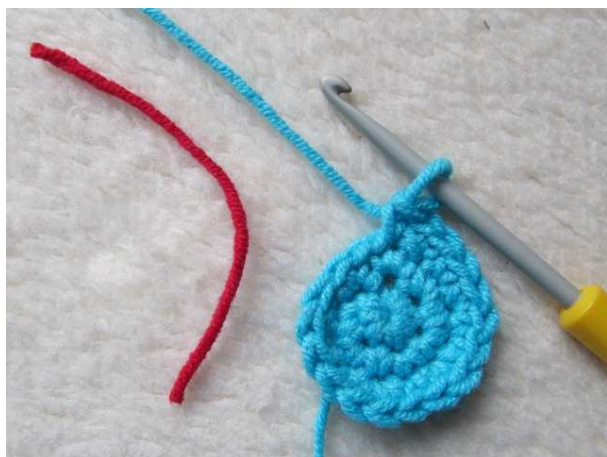

The beginning of each part

There are two options (I always use the second option. There are no holes at the beginning if you use the loop):

1. Start with chain 2 and work every first round into the first stitch made.
2. Start with a magic circle (adjustable loop) and work number of stitches in the first round into the loop.

Changing rounds

Do not replace crochet stitches by chain stitches at the beginning of each row. Instead make endless spiral. Crochet a first stitch of the row in first stitch of previous round. Use a stitch marker to remember of the beginning of the round. How to mark beginning of a row is demonstrated on pictures below.

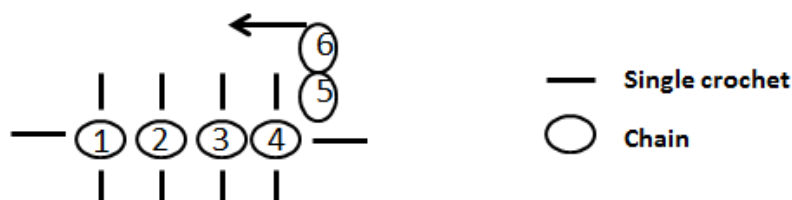

Loose ends

At the beginning and the end of a piece leave a tail of at least 15 cm or even longer, because most of these can be used for sewing. Loose ends you do not use anymore can be pulled through some stitches on the inside of the piece and cut off.

Sewing

Now we have all the parts we need to complete the dinosaur and we can start sewing.

1. First sew the neck on the body and stuff the neck. (See the picture below)
2. Sew the head and the neck. Stuff the neck enough.
3. Now we will complete the comb. Start with size C. Sew first part on the seam between head and neck (see the picture below). Then continue with size C towards tail and sew on two parts of size C. On the back sew two parts of size D, continue with one of size C, one of size B and the last on the Tail ist one of size A. From the first one towards muzzle continue with two parts of size C and one of size A. (You can follow the schema below.)

4. Now sew the legs on the body.
5. Now sew the spots on the back.
6. Make the nostrils with green yarn.

Dinosaur Dino is finished!
