General notes

Please read these instructions before working the pattern. If you find any mistake, please report it to DioneDesign@email.cz.

The beginning of each part

There are two options (I always use the second option. There are no holes at the beginning if you use the loop):

1. Start with chain 2 and work every first round into the first stitch made.
2. Start with a magic circle (adjustable loop) and work number of stitches in the first round into the loop.

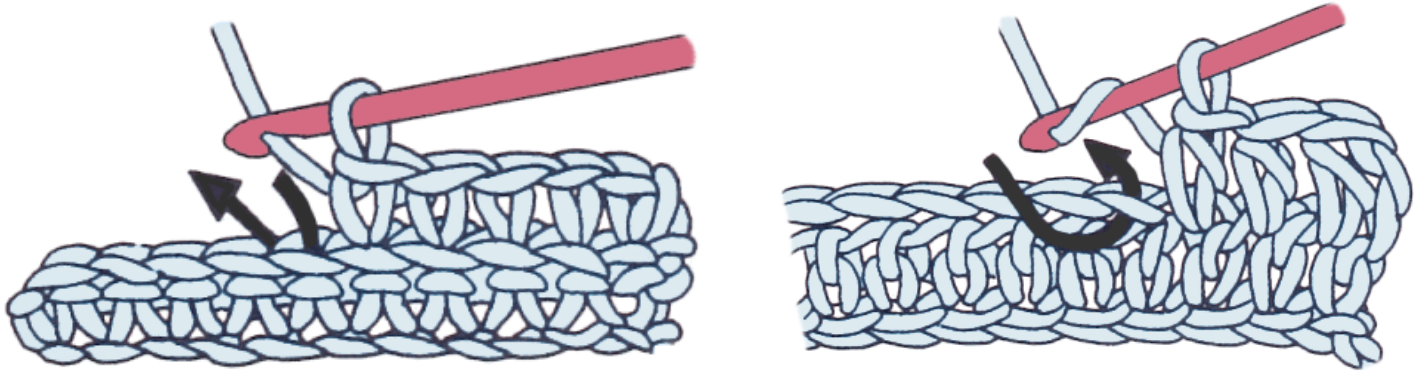

Changing rounds

Do not replace crochet stitches by chain stitches at the beginning of each row. Instead make endless spiral. Crochet a first stitch of the row in first stitch of previous round. Use a stitch marker to remember of the beginning of the round. How to mark beginning of a row is demonstrated on pictures below.

Crocheting in back/front loops only

Unless noted otherwise always work the rounds/rows through both loops. Sometimes we need to crochet different structures and we crochet some rows in back/front loops only. The pictures below show how to crochet through the back loops (left) or front loops (right) only.

Loose ends

At the beginning and the end of a piece leave a tail of at least 15 cm or even longer, because most of these can be used for sewing. Loose ends you do not use anymore can be pulled through some stitches on the inside of the piece and cut off.

Sewing

Now we have all the parts of the mouse ready and we can start sewing them together.

1. First sew the eyes on the head (the edges).
2. Then sew the body and the head together. (last row is the rear part of the neck).

3. Now sew the outer ears on the head.

4. Then sew the inner ears in the outer ears.

5. Now sew the arms and the legs on the body.

6. Then sew the tail on the body. You can stuff the tail, but I left it empty, it's more flexible.

7. Then sew the nose on the head and you can make eye lashes with black yarn.

8. As a last step, sew the hearts on the body. The bigger on the belly and the smaller on the back.
